INDEX

Academic librarians
  and attitude toward automation, 40
  and changing profession, 55,104,124
  community, vii
  and degrees beyond M.L.S., 2,18–19,20
  demographic characteristics, 37
  documentation requirements, 14–15
  and effectiveness, 11
  efforts to promote information "self-sufficiency," 99
  and feminine traits, 36–37
  and job satisfaction, 37–39
  and mentoring, 4,15–16
  personality studies, 35–37
  probationary period, 15
  professional uniqueness, 6
  publication requirements, vii,11–12
  and ranks, 17,20
  scholarship as a professional service activity, 2,4,9–10,12–14
  stereotypes, 56
  tenure approval rates, 3
  tenure requirements, 1–2,5,8,9,16
  and work behavior types, 49–52
  see also Job satisfaction
Academic libraries
  and application of DEA, 261–262
  areas of overlap with IT departments, 167–169
  best practices, 325,328
  library standards, 203–204
  modern needs vs. old personality profiles, 35
  "on-line help desk" concept, 148–149
  performance measures, ix,243,244
  and personnel management, 56–61
  reporting relationship, 180,181
  role of community college libraries, 202–206,210
  and social interaction, 149
  and technology, 40,156
  see also Advisory committees for community college libraries; Distance learning; Effectiveness
Advisory committees for community college libraries, viii,199–200, 207–210
  and collection development, 218
  feasibility/desirability, 217–219
  role and function, 100–201
  services listings, 210
  structure, 201

BCC, VRS input-oriented model see DEA

Business Information Service (BIS), 79–80,85–86

Carnegie Classification
  and CIO prominence, 175
  and educational needs, 19, 20
Charnes, A., Cooper, W.W., and Rhodes, E., 248
CIO
  and decentralization of computing, 164
  in different sized institutions, 169–171
  historical predictions, 161–162
  longitudinal vs. "snapshot" view, 171–173
  as new breed of information managers, 73
  and organizational structure issues, 164–166,180,181
  position purpose, 160–161
  prior studies, 162–164
  recognition, 176
  three-tiered span of control scale, 159–160
  see also Organizational governance models
CIO (Chief Information Officer), 155–156,158–159
  in higher education, 157
  and library administrative reporting, 158
Clinton Administration, and distance learning, 156
Cooper *see* Charnes
Culture
  and sense making, 111–112
  as webs, 135–136

DEA (Data Envelopment Analysis), 245–246,248–251
  and actionable recommendations, 328
  adding dummy variables, 298–303
  advantages as a tool, ix,246,330
  approach limitations, 250–251
  and ARL statistics, 263,320
  BCC, VRS input-oriented model, 260
  benchmarking, 245,270,329
  comparability issues, 264–265
  constraints derivation/effects, 272–279
  data scaling issues, 267
  DMU (decision-making unit), 248,249–250
  as efficiency measure, 250
  explaining scores, 312–313
  formulation, 253–259
  in library context, 261–262
  models classification, 259–261
  "peers" concept, 252
  score predictions, 309–312
  score reliability over time, 279–283,316–318,323–324
  sensitivity/noise analysis, 283–294,321
  "slack" concept, 253,325
Dervin, Brenda, 115
  role of information, 118
  sensemaking concept, 116
Dewey, Melvil, 25
Distance learning, 121–123
  and Clinton Administration, 156
  as a "disruptive technology", 104
  diversity, 105
  facilitative instruction techniques, 146–147
  future direction, 105–106,145–146
  international education at Thunderbird, 69
  learners as *bricoleurs*, 144,145,148–149
  research agenda, 103–104
  special challenges to libraries, viii,69,77–78,99

and technological opacity, 143
and "victim" libraries, 100–101
