Acknowledgements

This book is part of the PRIN project ‘SHAKE networks: The role of social media in emergency communication and dissemination of seismological research’, a designated Research Project of Relevant National Interest, funded by the Italian Ministry of Education (MIUR, 2012KMAEZF). The project involved Sapienza University of Rome and Istituto Nazionale di Geofisica e Vulcanologia (INGV).

More specifically, it collects the main results of the related ‘Communication’ Research Unit. We are grateful to our colleagues of the ‘Seismological’ Research Unit, Emanuele Casarotti, Licia Faenza and Federica Magnoni. We are also grateful to all the colleagues working at INGV, who shared their knowledge and their ideas with us. Alongside Piero Polidoro (who authored some parts of this book), we are grateful to the other colleagues who contributed to the Communication Research Unit, namely, Lorenza Parisi and Giuseppe Anzera.

Contents

About the Authors	<i>ix</i>
Introduction	<i>1</i>
Chapter 1 Top-down Information Dissemination during Natural Disasters	<i>5</i>
1.1. Disseminating Effective Warning Messages	<i>6</i>
1.2. Institutions' Communicative Practices in Emergency Situations	<i>7</i>
1.3. Limitations and Barriers to Social Media Adoption	<i>12</i>
1.4. Communicating Scientific Information within the Digital Media Environment	<i>14</i>
1.5. Case Study 1. A Qualitative Study of Italian Local-level Institutions' Social Media Usage Practices	<i>18</i>
1.6. Case Study 2. A Quantitative Study of Italian Local-level Institutions' Social Media Usage Practices	<i>26</i>
1.7. Case Study 3. INGV and USGS Communication Strategies on the Web: A Comparative Analysis (by Piero Polidoro)	<i>31</i>
1.8. Case Study 4. Infographics and Natural Disasters: A Typology (by Piero Polidoro)	<i>37</i>
Chapter 2 Citizens as Audiences for Top-down Information	<i>45</i>
2.1. Citizens' Needs and Behaviour	<i>46</i>
2.2. Citizens as (Social Media) Audiences for Top-down Information	<i>49</i>
2.3. Towards a Redefinition of the Communication Model	<i>53</i>
2.4. Case Study 1. A Quali-quantitative Study on User Comprehension of Earthquake-related Tweets by INGV	<i>57</i>
2.5. Case Study 2. An Italian National Survey on Users' Information-seeking Practices and Needs during and in the Aftermath of a Seismic Event	<i>66</i>

Chapter 3 The ‘Networked Model’: From Bottom-up Information Sharing to Digital Volunteers	81
3.1. The ‘Networked Model’	81
3.2. Audience-centric Approaches to Crisis (and/or) Disaster Communication	85
3.3. Networked: ‘The New Social Operating System’	88
3.4. From the ‘Connected Action’ Framework to Participatory Cultures and ‘Media Ideologies’: Further Insights from Communication and Internet Studies	90
3.5. Exploring the Affordances and Constraints of Social Media Platforms	93
3.6. From Emotional Sharing to Networked Volunteers: User Social Media Activity during and in the Aftermath of a Natural Disaster	95
3.7. Case Study 1: Tweeting during the Emilia 2012 Seismic Sequence	112
3.8. Case Study 2: Italian Citizens’ Sharing Practices in the Aftermath of an Earthquake	118
Chapter 4 The ‘Networked Model’: How Institutions Gather ‘Bottom-up’ Information from Social Media	123
4.1. Barriers to Using Social Media for Gathering Information	128
4.2. Citizen-generated Information and Situational Awareness	134
4.3. Automated Techniques to Overcome Misleading Content and Information Overload	138
4.4. Barriers to Gathering Information from Social Media: A Case Study Focusing on Local-level Emergency Managers in Italy	141
Conclusion	151
Afterword	161
References	165
Index	183

About the Authors

Francesca Comunello, PhD (Sapienza University), is Associate Professor of Internet Studies in the Department of Humanities, Lumsa University, Rome, Italy. Her research and publications focus on the intersections between digital technology and society, including social media and disaster communication, digitally mediated social relations, gender and ICT, mobile communication, ageing and ICT. She has been the Principal Investigator of ‘SHAKE networks: The role of social media in emergency communication and dissemination of seismological research’, a designated Research Project of Relevant National Interest, funded by the Italian Ministry of Education. Her work is published in journals such as, among others, *Games and Culture*, *Media Culture and Society*, *The Sociological Review* and *Annals of Geophysics*.

Simone Mulargia, PhD (Sapienza University), is Assistant Professor of Internet Studies in the Department of Communication and Social Research (CORIS), Sapienza University of Rome, Rome, Italy. His research and publications study the relationship between culture, technology and society, focusing on the role of digital media. His work is published in journals such as, among others, *Games and Culture*, *Media Culture and Society* and *The Sociological Review*.
