Systems Reliability Task Force (CICA/AICPA), 129–130
SysTrust, 152, 160
  denomination–system reliability assurance, 130

Tagging data accuracy, 209–210
Target, 37
Taxonomic categories development, 62–63
Technical architecture, of continuous assurance, 162–164
Technological feasibility, of continuous online auditing, 127
Technological process innovation, 272
Tertiary 'black box' monitoring, 207
Time focus, 30–31
Time interval, 32
Time series analysis, 210–211
Timing of continuous assurance, 202–203

Timing of testing, 276–277
Topical area, 62–65
  longitudinal analysis of, by specific area of emphasis, 70–75
Traditional auditing, 289
  distinguished from continuous auditing, 273
Transaction evaluation, 197–199
Transaction verification, 267
Treasury transactions, 3
Triple-entry accounting system, 301

UNIVAC, 286

Vector Autoregressive Models (VAR), 265–266
Verification, 88

Walker, David, 269
