

# INDEX

- Actionable metrics, 8
- Analogical evidence, 186
- Anecdotal evidence, 186
- Application architecture, 94, 102–103
- Attitudes and behaviors, 81, 147–148, 175, 178
- Business, 68. (*see also*
  - External business environment;
  - Internal business environment)
  - architecture of
    - dashboard, 95–98
  - intelligence dashboards, 91–92
  - metrics, 5, 10–12, 63–64
  - rules, 212
  - sciences, 10
  - tracking impacts of
    - knowledge to
      - business decisions and metrics, 122–124
  - tracking use and transformation
    - of knowledge by, 117–119
- Change/changing
  - culture, 39
  - management, 213–214
- Circumstantial evidence, 186–187
- Collaboration, 104
  - function, 133–134
  - sample metrics for, 134
- Communication
  - decision, 66
  - function, 135
  - professionals, 205
- Communities of practice (CoPs), 155, 173
  - knowledge exchanges within, 172–175
- Community building
  - function, 133–134
- Competitor analysis, 43
- Critical knowledge
  - management
    - metrics, 62–63
- Customer satisfaction, 7
- Dashboard, 90, 93
  - application and
    - technical application development, 110–112

- conceptual and functional architecture design, 107–108
- data and knowledge architecture development, 109–110
- data entry portal design, 108–109
- design process, 104
- development process, 105
- knowledge management metrics, 90–91
- query and reports development, 112
- requirements elicitation, 105–107
- stages, 104–105
- Data
  - entry portal design, 108–109
  - sciences, 6
- Dead knowledge, 151
- Decision
  - analyzing evidence, 63–64
  - building out metrics framework and strategy, 68
  - choose among alternatives, 64–65
  - communicate decision, 66
  - decision making, 65–66
  - decisions and metrics in business functions, 67
  - event, 119
  - gathering evidence, 61–63
  - incident, 119
  - knowledge management function, 67–68
  - makers, 22, 30–31
  - models, 5–6, 55–56
  - recognizing decision, 57–61
  - science, 22–23, 31
  - steps, 56–57
  - taking action, 66–67
- Decision-making, 4, 21–24, 65–66
  - building out metrics framework and strategy, 45–47
  - factors associated with external business environment, 42–45
  - factors associated with internal business environment, 33–42
  - factors associated with nature of decision, 24–32
  - style, 31–32
- Demonstrative evidence, 187
- Department or division level managers, 204
- Development process, 100
- Digital evidence, 187
- Divisional organization structure, 38
- Documentary evidence, 187–188

- Effective metrics, 60
- Emotional decision-making, 31
- End-based ethical principles behavior, 32
- Evidence
  - based on level of trust or verifiability, 188–189
  - definitions and characterizations, 183–184
  - managing source data and, 189–194
  - metrics architecture and infrastructure, 195
  - by relationship to source, 185–186
  - by relevance to decision problem, 186–188
  - types, 184–189
- Expanded scorecard approach, 146
- External business
  - environment, 23–24
  - factors associated with, 42
  - macro business environment, 43
  - organization's business vision and goals, 44–45
  - organizations
    - position or role in environment, 43–44
- Financial valuation approach, 146
- Flat organizations, 37
- Functional
  - area, 27–29
  - metrics, 90
  - organizations, 37–38
- Governance
  - definition and characterization, 209–210
  - models and processes, 210–215
- Group-think decision-making styles, 31
- Human capital, 147.  
(*see also* Relational capital; Structural capital)
  - asset visual model, 148
  - metrics, 147–149
- Hybrid dashboards, 91
- “Incident-analysis” approach, 47
- Information technology, 10
  - decisions and metrics, 29
- Informational metrics, 8
- Internal business
  - environment, 23
  - factors associated with, 33
  - organization types, 33–37
  - organization's culture, 38–42
  - organization's structure, 37–38

- Key performance indicators (KPIs), 5–7, 45, 90, 95
- Knowledge, 43
  - architecture function, 137
  - assessment function, 138
  - behaviors, 59
  - economy, 75, 117–118
  - in decision-making, 28
  - operation function, 135–136
  - operationalizing
    - knowledge metrics, 120, 124
  - technologies function, 136–137
- Knowledge asset(s), 59, 77, 81–82, 146–147
  - management function, 138
  - metrics strategy, 146
  - production and consumption, 147
- Knowledge capacity, 75–76
  - knowledge management metrics, 78
  - knowledge management metrics alignment to, 76–77
  - lagging knowledge management metrics, 80–82
  - leading and lagging metrics to support, 77
  - leading knowledge management metrics, 79–80
- Knowledge capital, 147
  - definition and characterization, 145–146
  - human capital metrics, 147–149
  - management function, 133
  - relational capital asset metrics, 153–156
  - roles and responsibilities, 156
  - structural capital metrics, 149–153
  - tracking organization's knowledge capital assets, 146–147
- Knowledge management (KM), 28, 101
  - definition and characterization, 132–139
  - function decision processes, 67–68, 77, 80–81
  - functions and capabilities, 130
  - leadership and strategy function, 132–133
  - practitioners, 204
  - professionals, 60–61, 204
  - roles and responsibilities, 140–141
  - tracking leading and lagging metrics for, 140

- tracking performance and productivity of, 130–131
- Knowledge management
  - metrics, 3, 9, 22–23, 45–47, 76, 95, 201
  - alignment to knowledge capacity, 76–77
  - using and managing, 204
  - application architecture, 102–103
  - architectures, 91–94
  - building business and, 13–15
  - business architecture, 95–98
  - creating source evidence, 203
  - current state of, 12–13
  - dashboard, 90–91
  - data and knowledge architecture, 98–100
  - design process, 104
  - developing and growing metrics culture, 205–206
  - dimensions, 202–203
  - envisioning dashboard for, 89–90
  - identifying and defining metrics and sources, 203
  - knowledge assets, 81–82
  - knowledge management functions, 80–81
  - lagging, 80
  - leading, 79–80
  - maintaining and sustaining dashboard, 112–113
  - metrics architecture layers, 93
  - organization, decisions, metrics, 15
  - people architecture, 100–102
  - promoting and communicating, 204–205
  - strategic architecture, 94–95
  - technology architecture, 103–104
- Lagging knowledge management metrics, 77–78, 80
  - knowledge assets, 81–82
  - knowledge management functions, 80–81
- Leading knowledge management metrics, 78–80
- Level of trust, evidence based on, 188–189
- Local curation, 191
- Logical decision-making, 32

- Macro business
  - environment, 43
- Measure(ment), 9
  - aligning metrics with measurement methods, 168–180
  - definition and characterization, 163–166
  - reliability and validity, 166–168
  - rigor and relevance, 180
- Merchandising business, 34–36
- Metrics, 3–5, 22–23, 28, 40
  - analytics, metrics, and decision models, 5–6
  - architecture layers, 93
  - building business and knowledge metrics framework, 13–15
  - building out metrics framework and strategy in decision process, 68
  - in business functions, 67
  - business metrics types, 10–12
  - care about, 9
  - common assumptions about, 7–8
  - in context, 6–7
  - current state of knowledge management metrics, 12–13
  - decision points in organization’s core business processes, 120–122
  - decisions and action plans, 215
  - framework and strategy, 45–47
  - governance model, 210–211
  - information technology decisions and, 29
  - maintaining and sustaining, 215
  - and measurement, 8–9
  - operationalizing knowledge metrics, 124
  - organization, decisions, metrics, 15
  - reviews and management, 214–215
  - strategies, 60
  - tools and processes, 212–214
  - tracking impacts of knowledge to business decisions and business metrics, 122–124
  - tracking use and transformation of knowledge, 117–119
  - triggers of and inputs to, 211–212

- Nature of decision, 23
  - decision maker, 30–31
  - decision-making style, 31–32
  - factors associated with, 24
  - functional area, 27–29
  - level of decision, 25–27
- Network capital, 153–156
- Off-site curation, 191
- Operational decisions, 26–27
- Operationalizing
  - knowledge metrics, 124
- Organization(al)
  - business vision and goals, 44–45
  - capital, 152
  - culture, 38–41, 135, 152
  - decision points in organization's core business processes, 120–122
  - learning function, 139
  - life cycle, 41–42
  - manufacturing business, 36–37
  - position or role in environment, 43–44
  - retail and merchandising business, 34–36
  - service business, 33–34
  - structure, 37–38
  - types, 33
- People architecture, 100–102
- Performance metrics, 4
- Physical evidence, 188
- Preservation of sources of evidence, 191–194
- Primary source of evidence, 185–186
- Principle-based decision-making, 32
- Problem-related decisions, 59
- Procedural capital, 151
- Process
  - efficiency and effectiveness, 171
  - engineering for new chemical product, 175–178
- Qualitative metrics, 7
- Quality management evolution, 10
- Quantitative metrics, 7–8
- Relational capital, 147, 153–156. (*see also* Human capital; Structural capital)
  - asset metrics, 153–156
  - knowledge, relationships and flows, 154
- Relationship to source, evidence by, 185–186
- Relevance, 180, 185
  - evidence by relevance to decision problem, 186–188

- Reliability, 166–168
- Reputational capital, 153–156
- Retail business, 34–36
- Return on Investment (ROI), 10
- Rigor, 180
- Secondary sources of evidence, 185–186
- Semantic analysis
  - application, 103
- Skills and competencies, 148
- Statistical sources, 188
- Step-by-step decision-making process, 22
- Strategic decisions, 25–26
- Structural capital, 147. (*see also* Human capital; Relational capital)
  - asset visual model, 151
  - metrics, 149–153
- Structured decision, 27
- Tactical decisions, 26
- Tangible assets, 146
- Technology architecture, 103–104
- Toxic cultures, 40
- Tracking
  - impacts of knowledge to business decisions and business metrics, 122–124
  - of knowledge, 117–119
- Transformation, 190
  - of knowledge, 117–119
- Validity, 166–168
- Vanity metrics, 8
- Verifiability, evidence based on, 188–189
- Whole organization metrics
  - strategy
    - knowledge capacity, 75–76
    - knowledge management metrics alignment, 76–77
    - leading and lagging metrics, 77–82
    - set of metrics, 82–83
