Ability-signaling hypothesis, 53–54
Accounting (*see also* Behavioral accounting), 78
  system, 80
Accounting decisions (*see also* Non-accounting decisions), 53–54
Agency theory, 83, 118–119
AHP model, 162
Akaike Information Criteria (AIC), 133–134
Anglo-Saxon Model, 120
Anonymity hypothesis, 56–57
ARAS method, 162
Asset quality, 164
Asymmetric causality test, 146–147, 149–150
  cointegration test, 148–149
  data, analysis, and findings, 151–155
  between developed and emerging markets, 146
  literature, 147–148
  methodology, 148
Audit firms, 54
Augmented Dickey Fuller test (ADF test), 66
  findings, 69
  unit root test, 67, 133, 152–153

Banking system, 160
Banks, 160
Banks Listed in Borsa Istanbul (BIST), 161
  banks, 160–161
  data set, 164–165
  findings, 170–175
  GRA, 165–168
  limitations, 179
  literature review, 161–164
  results, 175–179
  TOPSIS, 168–170
Behavioral accounting, 78
  agency theory, 83
  contingency approach, 82
  development, 78–79
  equality theory, 81–82
  expectation theory, 81
  factors influencing behavioral dimension of accounting, 79–81
  goal setting theory, 82
  neuroaccounting, 84–86
  private sector in Turkey, 77
  research in World and Turkey, 83–84
  theories in, 81
Behavioral finance theory, 128
Big-Four audit firms, 54
"Bim" service, 92
Bonus contract hypothesis, 54–56
Borsa İstanbul manufacturing industry firms, 38–39
Brazil, Russia, India, China and South Africa (BRICS), 23–24
Business, 140
  climate change disrupt business of bank's customers, 140–141

Capital
  adequacy, 164
  flow, 146
Capital Expenditure (CAPEX), 222
Capital expenditure to sales ratio (*CAPEXS* ratio), 223

Cash flow volatility (CFV) (*see also* Earnings volatility (EV)), 218, 246
  modelled impact on Maltese operational CFV, 244–246
  POMs for, 255
  reduction in, 223–225
Causality analysis, 152
Central Bank of Malta (CBM), 197
Chi-square (x^2)
  distribution, 68
  test statistics, 25
Climate change, 139
  confusing regulators, 143
  damaging physical collateral, 140
  disrupt business of bank's customers, 140–141
  disrupt operations of financial institutions, 140
  effect on financial sector, 139–140
  effect on financial system, 142
  harsher working conditions, 141
  higher disclosure requirement and costs, 142
  increased insurance premiums and reduction in coverage, 141
  leading to capital flight, 143
  loss of office branch networks, 142
  severe climate change leading to increased insurance claims and liabilities, 141
  uncertainty destabilizes financial markets, 143
Cluster
  analysis, 3, 7–8
  sampling, 8
Collaborative intervention theory of financial inclusion, 101
Collapse avoidance hypothesis, 57–58
Collective Investment Schemes, 230
Commodity price risk (CPR), 234
Community Echelon theory of financial inclusion, 98–99
Confidence, 129–130
  indices, 128–129, 132
Consumption price index (CPI), 25
Continental Europe Model, 120
Contingency approach, 82
Corporate governance, 119–120
  models, 123–124
Corporate risk management, 218
Costs of financial distress (CFD), 220
Country-level investor protection, 120
Crash model, 25
Critical mass of operations, 226–227
Culture, 79
  shock, 199
Cumulative logit link function, 224
Cumulative seasonal decomposition method, 151
Customs, 279–282

Data
  pre-processing, 166
  set, 164–165
Decision(s), 80
  decision-making process, 160
  matrix, 166
Derivative hedging instruments (DHIs), 218
  accounting treatment applied for DHIs and Hedging relationships, 242–243
  comparison of results with previous studies and deliberation, 246–249
  descriptive statistics pertaining to variables, 238
  determinants of Maltese DHI usage, 236
  impact on DHI usage and HA on local earnings and operational CFV captures, 243
  Mann–Whitney-*U* test outcomes, 239
  modelled impact on Maltese EV, 243–244
  modelled impact on Maltese operational CFV, 244–246
  number of DHI identifications, 237

prevalence of Maltese DHI usage, 232–236
rationale for DHI usage, 219–220
significant determinants at individual proxy variable level, 240
significant determinants resultant from Logit model, 240–242
Dickey–Fuller-Generalized Least Squares unit root test (DF-GLS unit root test), 152–153
Direct fixed capital investment (GSSO), 66, 68
Dow Jones Industrial Average index (DJIA index), 148, 151, 153–155

Earnings volatility (EV) (*see also* Cash flow volatility (CFV)), 218, 224
POMs for, 255
reduction in, 223–225
Economic
agents, 22
confidence index, 129
efficiency, 277
indicators, 128
migration indicators, 3
sensitivity index, 130
Economic policy uncertainty index (EPU index), 22, 32
Effective hedgers (EH), 227*n*10
Equality
in taxation, 277
theory, 81–82
Error correction models (ECM), 63, 134
Ethical understanding, 81
European Economic and Social Committee (EESC), 198
European Markets Infrastructure Regulation (EMIR), 230
European Parliament (EP), 196
European Securities and Markets Authority (ESMA), 230
European Union (EU), 277
immigration cluster analysis results, 9–12
progress report for Kosovo, 279–282

Facial Coding (FaCs), 85
Filipino live-in care workers in Malta, 198
choosing Malta, 201–204
contextual setting, 197–199
life beyond work, 210–211
methodology, 199–201
motivation and employer's relations, 207–208
social integration, 208–210
working conditions, 204–207
Filipino migrant community, 197
Final prediction error (FPE), 133–134
Financial Crisis Inquiry Commission (FCIC), 186–187
Financial inclusion, 90
case studies, 104–105
empirical data, 104
foundations, 91–93
theories of financial inclusion beneficiary, 93–98
theories of financial inclusion delivery, 98–102
theories of financial inclusion funding, 102–104
theory in, 90–91, 109–115
Financial/finance
climate change disrupt operations of financial institutions, 139–140
entity, 230*n*12
information, 160
integration, 146
literacy theory of financial inclusion, 101–102
markets, 146
policy, 62
potential costs of financial distress, 220–222
reporting, 49, 51
skills, 50

stem, 142
system regulators, 143
Foreign currency risk (FCR), 234
Forensic accounting theory (*see also* Behavioral accounting), 49–50, 52–53
ability-signaling hypothesis, 53–54
accounting decisions, 53
literature review, 50–52
materiality hypothesis, 53
non-accounting decisions, 54–58
Fraud
detection, 49–50, 52
schemes, 51
Functional magnetic resonance imaging (fMRI), 85

G2P social cash transfer, 96
Galvanic skin response (GSR), 85
Gearing ratio (*GR*), 222
Global financial crisis (2008), 22–23, 62
on cause of crisis, 186–187
liquidity, 191
long before financial crisis, 185–186
preparing for next, 192–193
questioning economics profession, 190–191
reflections after financial crisis, 188–189
rethinking economics of financial regulation, 189–190
shortly before and during, 186
Sober reflection, 193
Global risk perception, 23, 25, 29
Goal setting theory, 82
Granger casualty/causality test, 64–65, 135
Gray relational analysis models (GRA models), 161, 165–168, 173–174
Gray relational coefficient matrix, 167
Gross domestic product (GDP), 6, 63
per capita, 7

Hannan Quinn criteria (HQ), 133–134
Hatemi-J asymmetric causality test, 154
Hedge accounting models (HA models) (*see also* Behavioral accounting), 218–219
impact on local earnings and operational CFV captures, 243
reporting volatility reduction and adoption of HA regime, 227–228
Hedge fund activism, 120–122
Hedging, 218
characteristics of DHI users, 219–220
data and sampling frame, 230
derivatives, 220
detailed variable descriptions, 256–257
determinants of Maltese DHI usage, 236–249
effective reduction of entity's corporate tax rate, 220–222
explanatory note on use of POMs for EV and CFV, 255
firms, 227
HA models, 218–219
hypothesis formulation for factors affecting Maltese entities' DHI usage, 220
mitigating inefficient investment, 222
mitigation of agency problem and critical mass of operations, 226–227
model specifications, 230–232
non-normality of data collected for variables under study, 254
parsimonious model selection, 253
potential costs of financial distress, 220–222
prevalence of Maltese DHI usage, 232–236
reduction in EV and CFV, 223–225
reporting volatility reduction and adoption of HA regime, 227–228

research findings and deliberation, 232
research methodology outline, 228–230
Humanitarian migration (*see also* International migration), 14
