

Index

- Absolute advantage theory, 66–67
- Adjusted net savings, 29
- Agriculture, 42
- Alibaba, 80–81
- Amazon, 80–81
- Antidumping, 32
- Autocorrelation, 95
 - residuals, 95

- Belt and Road Initiative (BRI), 83
- Breusch-Pagan test, 93–94

- Capital, 4
 - circulation of, 5
- Carbon intensity of GDP, 30
- Centralist socialism, 5
- China, 1–2, 83
 - autocorrelation, 95
 - compliance with assumptions, 93
 - economic effect of international trade between Latin America and, 84, 90, 96
 - heteroskedasticity, 93–94
 - international business with world regions, 85
 - and Latin America, 86
 - materials and methods, 90–91
 - multicollinearity, 94
 - normality of residuals, 94–95
 - results, 91–95
 - stationarity, 95
 - statistical estimates, 93
- Circular causality, 73
- Comparative advantage theory, 67–68
- Competition, 32
- Consumer Price Index (CPI), 52
- Corruption, 32
- COVID-19, 81

- Cuban Revolution, 12

- Darwinian model of evolution, The, 11
- Dependence Theory, 12–15
- Deprivation approach, 20
- Development theories, 12
- Developmentalism, 12
- Digital commerce, 80–81

- E-commerce, 80–81
- Econometric strategy, 52–55
- Economic Commission for Latin America and the Caribbean (ECLAC), 12, 14, 25, 37, 39, 44–45, 84–85
 - competitiveness, 32
 - dimensions according to, 30–32
 - education, 31
 - gender, 32
 - labor market policies, tax policies, 31–32
 - political and social instability, 32
 - poverty, 32
 - productivity, 31
 - technology, 30–31
 - value chains, 31
 - work, 31
- Economic growth, 2, 48
 - endogenous growth model, 9–10
 - evolutionary theories of, 10–11
 - Harrod–Domar Models, 6
 - ISI model or dependence theory, 12–15
 - modern and contemporary theories of economic growth or neoclassical theories of, 6–7
 - modern Post-keynesian theories, 7–9
 - neoliberal model, 15–16

- new economic trends post-financial crisis 2008, 16–18
 - Solow–Swan Model, 6–7
 - traditional classical theory of, 3–5
- Education, 31
- Employment, 27
 - dimension, 33
- Employment-population ratio, 28
- Endogenous growth model, 9–10
- European Economic Community, 74–75
- Evolutionary Theories of Economic Growth, 10–11
- Exclusion, 44–46
- Exponential economic growth, 11

- Fiscal policy, 48–51
- Foreign Direct Investment (FDI), 1, 34, 83, 90, 97

- Gender, 32
- General Agreement on Tariffs and Trade, 15–16
- Generalized Least Squares (GLS), 55, 97
- Gini coefficient, 28–29
- Gini income, 28
- GINI index, 45–46
- Gini wealth, 29
- Global commodity chains (GCCs), 78
- Global digital commerce, 80–81
- Global markets, 32
- Global production networks, 16–17
- Global value chains (GVCs), 77, 79
- Government debt, 29
- Gravity model, 74, 90–91, 97
- Gross domestic product (GDP), 1, 14–15, 19, 74, 84
 - growth, 97
 - per capita, 26

- Harrod–Domar Models, 6
- Hausman test, The, 60
- Hayekian-oriented neoliberals, 15–16
- Health dimension, 33
- Healthy life expectancy, 27
- Heckscher–Ohlin factors, 68–70
- Heckscher–Ohlin model, 69, 75
- Heteroskedasticity, 93–94
 - studentized Breusch-Pagan Test, 94

- Import Substitution Industrialization model (ISI model), 12–15
- Inclusion, 28–29, 44, 46
- Inclusive economic growth, 2, 19–21, 56, 97
 - determinants of inclusive economic growth in Latin America, 34–64
 - dimensions according to ECLAC, 30–32
 - dimensions according to OECD, 32–33
 - dimensions according to WEF, 26–30
 - dimensions according to World Bank, 33–34
 - dimensions and indicators of, 26–34
 - proposed by other authors, 34
- Inclusive growth (*see also* Economic growth), 47
 - determinants of, 48–51
 - fiscal, monetary, and structural policy, 48–51
 - in Latin America, 40–47
- Income, 21
- Independent Commission for the Reform of International Corporate Taxation (ICRICT), 18
- Inequality, 24, 44, 46
- Input-output method, 70–71
- Intergenerational equity and sustainability, 29–30
- International cooperation and dependence, 12–13
- International Monetary Fund (IMF), 14–15, 24
- International organizations, 24
- International trade, 89
 - between China and Latin America, economic effect of (2000–2021), 84, 90, 96
 - Heckscher–Ohlin factors, 68–70

- Leontief Paradox, 70–71
- models, 71
- modern theory of international trade, 71–81
- theory of absolute advantage, 66–67
- theory of comparative advantage, 67–68
- theory of mercantilism, 65–66
- traditional theory of international trade, 65–71
- Internationalization processes, 1–2
- Jarque–Bera test, 53–54
- Kuznets Curve, 20–21, 44
- Labor market policies, 31–32
- Labor productivity, 26–27
- Lagrange multiplier test, 58, 60
- Latin America, 83–84
 - autocorrelation, 95
 - China and, 86
 - compliance with assumptions, 93
 - description and abbreviation of variables of econometric model, 53
 - descriptive statistics of variables, 57
 - determinants of inclusive economic growth in, 34–35, 51, 62, 64
 - determinants of inclusive growth, 48–51
 - distribution of income per capita, 36, 38–39
 - econometric strategy, 52–55
 - economic effect of international trade between China and, 84, 90, 96
 - environmental factors, 46–47
 - heteroskedasticity, 93–94
 - inclusion, exclusion, and inequality, 44–46
 - inclusive growth, 40, 47
 - linear correlation between inclusive economic growth and explanatory variables, 58
 - materials and methods, 52, 55, 90–91
 - median of variables, 58
 - multicollinearity, 94
 - normality of residuals, 94–95
 - poverty and multidimensional poverty, 41–44
 - probability value of previous tests, 54
 - probability value of selection and econometric validation tests, 59
 - results, 55–61
 - results, 91–95
 - socioeconomic and environmental situation in Latin America, 41–47
 - stationarity, 95
 - statistical estimates, 93
- Latin American economy, 13–14
- Leontief Paradox, 70–71
- Liberal socialism, 4
- Mercantilism theory, 65–66
- Modern theory of international trade, 71–81
 - digital commerce, 80–81
 - global value chains, 77–79
 - new theory of international trade, 72–77
 - product life cycle, 71–72
- Monetary policy, 48–51
- Monopsonist, 8
- Multicollinearity, 94
 - Jarque Bera Test, 94
 - variance inflation factor, 94
- Multidimensional poverty, 41–44
- Multidimensional Poverty Index (MPI), 43
- National Superintendence of Customs and Tax Administration (SUNAT), 65
- Natural resources, 86
- Neoclassical theories of economic growth, 6–7
- Neoliberal capitalism, 16
- Neoliberal model, 15–16
- New Theory of International Trade (NTC), 72–77

- Newey-West standard errors, 97
 North American economy, 13–14
- Ordinary Least Squares (OLS), 97
- Organization for Economic Cooperation and Development (OECD), 24, 28
 dimensions according to, 32–33
 employment dimension, 33
 health dimension, 33
 real household income, 33
- Pacific Alliance, 60–61
 Peru, 1–2, 81
 international trade in, 97–98
 national innovation system, 25–26
- Poles, 10–11
 Political instability, 32
 Porter diamond theory, 77
 Post-financial crisis (2008), 16–18
 Post-keynesian theories, 7–9
 Poverty, 32, 41, 44
 Prébisch–Singer’s thesis, 13
 Product life cycle, 71–72
 Purchasing power parity (PPP), 27
- Rate of poverty, 28
 Ratio of dependency, 30
 Real Effective Exchange Rate (REER), 34
 Real household income, 33
 Regression models, 91
 Relative income poverty, 28
 Residuals, normality of, 94–95
- SARS-CoV-2 virus, 39–40
 Serial autocorrelation, 95
 Social exclusion, 44
 Social inclusion, 25–26
 Social instability, 32
 Socialism, 18
 Solow–Swan Model, 6–7
 Stationarity, 95
 augmented Dickey-Fuller Test, 96
- Statistical data, 52
 Statistical validation of selected model, 55
 Structural policy, 48–51
 Sustainability, 29–30
- Tax benefit systems, 48–49
 Tax incentive systems, 49
 Tax policies, 31–32
 Technology, 70–71
 Theil index, 45–46
 Trade, 76–77
 Traditional classical theory of economic growth, 3–5
 Traditional theory of international trade, 65–71
 “Trickle-up” theory, 21
- “Un-socialized” community, 5
 United Nations Conference on Trade and Development (UNCTAD), 16–17, 78–79
 United Nations Development Programme (UNDP), 2, 35, 43
 United Nations Educational, Scientific and Cultural Organization (UNESCO), 24
 University of Oxford, The, 43
- Value chains, 77
 Vernon model, 71–72
- World Bank, 14–15, 19, 24, 28–29, 37, 39–42, 84–85
 dimensions according to, 33–34
 World Economic Forum, The (WEF), 26, 28–29
 dimensions according to, 26–30
 growth and development, 26–28
 inclusion, 28–29
 intergenerational equity and sustainability, 29–30
