

Index

- Absolute income hypothesis, 320
Adverse selection, 76–77
Agrifood system, 102–103
Asian Development Bank (ADB), 162
Association of South-East Nations (ASEAN), 260–263
Atal Jyoti Yojana (AJAY), 154
Atomic nuclei, 88
Augmented Dicky Fuller test (ADF test), 305
Auto Regressive Distributed Lag model (ARDL model), 260
Autocorrelation function (ACF), 206
Autocorrelations (AC), 207
Availability-Based Tariff (ABT), 151
- Banking crisis (BC), 51, 53
Banking sector, 134
Bankruptcy of business, 51
Banks, 134
Benchmark analysis, 56–58, 63
 economic crises and poverty, 56–63
Bio-based economy, 100
Bioeconomy (*see also* Circular bioeconomy (CBE)), 100
Bishnupur, factors contributing to, 181
Brazil, Russia, India, China and South Africa (BRICS), 244, 300
Breakpoint test, 309–310
Brecher-Alejandro Proposition, 5–6
Bretton Woods institutions, 280
Breusch-Pagan LM diagonal covariance matrix test, 54
Business models and engaging private players, 104–106
- Capacity building among key stakeholders, 106–107
Capital-labour ratio, 10
- Carbon emissions (CEs), 260–261
Carbon markets, 109–110
Carbon pricing instruments (CPIs), 109–110
Casino Capitalism (1986), 82
Catch-up response, 204–206
Central Electricity Regulatory Commission (CERC), 153–154
- Circular bioeconomy (CBE), 100
 business models and engaging private players, 104–106
 capacity building and skill development among key stakeholders, 106–107
 carbon markets, 109–110
 cross-cutting nature, 101
 gradual transition to, 101
 indicators for measuring development, 110
 promoting enabling environment for, 108–109
 resilience to pandemic through circularity, 104
 and RULs, 101–103
Circular economy, 100, 102, 180
 food wastes in, 180–181
 framework, 178–179
Clean cooking fuels, 186–188, 191
 impact on access to, 196–197
Clean energy, 93, 159, 187
 impact of COVID-19 pandemic, 196–199
 India's drive to provide affordable, reliable and modern energy services, 187–192
Climate change, 232
CO₂ equivalent (CO₂ eq), 102
Coal, 187

- Coefficient of variation (CV), 124
- Combustible renewable and waste (CRW), 260–261
- Common Market for Eastern and South Africa (COMESA), 261, 263
- Commonwealth of Independent States (CIS), 261
- Community-based organisations (CBOs), 104–105
- Competitive zero profit condition, 8
- Composite Sex Ratio Index, 28–29
- Composition Effect, 259
- Concurrent crisis, 63
- Conference of Parties (COP), 272
- Conflicts, 218
- Consumer price index (CPI), 54
- Consumption-based CO₂ emission (CBE), 260–261
- β -convergence, 27
- σ -convergence, 27
- Cooperation, 220
- Cooperative approach, 221
- Correlation analysis, 253–254
- Correlogram, 206
- COVID-19, 162–163, 168
 - deficient demand, 155
 - pandemic, 178, 232
 - power generation during, 155
 - power sector, 154–155
 - snapshot, 163–164
 - as threat to progress towards SDGs across world, 168–170
 - vaccination, 328
- Crisis, 38, 50, 77–78, 302–303
 - benchmark analysis, 56–63
 - data description, 52–53
 - empirical methodology, 53–54
 - results, 54–56
 - robustness check, 63–71
- Crony capitalism, 82
- Currency crisis (CC), 53
- Debt crisis (DC), 53
- Debt-deflation theory (Fisher), 76–77
- Deen Dayal Upadhyaya gram Jyoti Yojana (DDUGJY), 153, 186–187
- Deficiencies in governance systems, 225
- Deglobalisation, 277–279, 286
 - effect, 288–290
 - process, 287–288
- Deprivations, 225
- Developing Countries (DC), 29
- Developing economies, 27, 300–301
- Developing nations, 300
 - brief review of existing literature, 303–304
 - data and methodology, 304–307
 - results, 307–310
- Difference-in-difference (DID), 163
 - analysis of differential impact of COVID-19 on progress of SDGs, 171–172
 - result, 172
- Distribution Companies (DISCOMs), 153–154
- Domestic capital, 7, 14
- Durbin-Watson value, 307–308
