Contavidade [1]

Beyond the bill, numbers, reports and analysis

There are lives in accounting

Trajectories

Dreams

Stories.

They talk so much about data analysis

Technology

Sounds up to dehumanization

After all, behind all this, there are lives, isn't it my brother?

Think about the life of the people who want to be in yours, but cannot, you know why?

Because it is not "standard" that you are inserted, and for being accepted, promoted, in this accounting profession

White male cisgender

Heterosexual

The "ideal" pattern

The image of the boss

Uneven reality.

And in the face of this scenario, it is up to me to question

Can a transgender woman be in your shoes today?

Black man this occupied leadership space?

Disabled person teaching Accounting Sciences?

So let's reflect?! Change?! Include and respect?!

After all

The accounting

Beyond the bill, numbers, reports and analysis

Are lives

Trajectories

Dreams

And several stories.

## Note

1. Contavidade is a term created to express that there are lives in accounting, beyond numbers, reports and data analysis. "Contavidade" is the union of "Conta" = Accounting + "vidade" to express life.
