

# INDEX

- Accounting, 64, 100, 144–146
- Administrators, 142
- Admission to universities,
  - reforming activity in, 181
- Adult Literacy and Lifeskills Survey (ALL), 175
- Adult skills, survey of, 49–50
- “Advanced vocational education” credentials, 60
- A-levels grades, 18
- Allocation of talent, 204
- Allocation on the labor market, 306
- Allocative efficiency, 201, 202, 213, 222, 223, 224, 226
- American Community Survey (ACS), 151
- Anthropology & Archeology, 147
- Apparent matching (AM), 245, 254, 267
- Apparent overeducation (AO), 245, 254
- Assignment theory, 86
- Average marginal effects (AMEs), 364, 369, 375, 383, 388, 403, 406
- “Bang-for-the-buck”, 203, 229
- Biology, 152
- Biotechnology industry, 155
- Botany, 147
- Career mobility theory, 87, 99
- CEDEFOP ESJS, 292, 335
- Cedefop European skills and jobs survey (ESJS), 84, 87–89, 295, 413
- Cognitive decline, 307
- Cognitive skills, 45, 175, 176, 177
  - schooling and, 177
- College degree, choice of, 130
- Competences and skills, 187
- Compulsory secondary school, 180
- Concentration curves for three hypothetical majors, 138
- Confirmatory Factor Analysis, 440
- Deconstructing theories of overeducation in Europe, 81
- Cedefop European Skills and Jobs survey (ESJS), 87–89
  - decomposition analysis, 104–112
    - endowments differences between matched-overeducated workers, 104–110
    - unexplained wage differences between matched and overeducated workers, 110–112
  - earnings regressions, estimation of, 100–104
  - empirical methodology, 95–99

- key variables and summary statistics, 89–95
- magnitude and robustness of wage penalty estimates, 84–86
- ORU approach, 85
- potential determinants of overeducation, 86–87
- wage decomposition approach, 81
- Destination of Leavers of Higher Education (DLHE), 3, 7, 10
- Digital Taylorism, 46
- Distinctiveness, 131, 132–136, 142–147
- Doctoral education in Italy, 247–250
- Double selection model, 4, 14, 21, 25
  
- Earnings, 173, 176, 181, 186, 188, 190
  - inequality, 176, 181
  - by subject of study and occupation, 13
- Earnings inequality, 176
- Earnings model
  - IV estimates, 192
  - OLS estimates, 190–191
  - recursive system estimates, 194
- Economics, 131, 150
- Educational mismatch, 89, 351, 352
- Educational reforms, 176–177, 179, 188, 189
- Educational system, governmental design of, 280
- Education–job mismatch, 245, 250, 261–262, 272
- Education reforms, 195
  
- Empirical model, 218–220
- Endogeneity of overeducation, 246, 250, 260
- English, 144, 150
- EU New Skills for New Jobs Strategy, 333
- Europe, overeducation in. *See* Deconstructing theories of overeducation in Europe
- European Centre for the Development of Vocational Training (Cedefop), 84, 280, 300, 308, 311, 417
- European skills and jobs survey (ESJS), 84, 87–88, 280, 282, 295, 413
- Exclusion restriction, 260
- Executives, 142
  
- Formal education, 360, 361
- F*-statistic, 188, 191
  
- Gender, 98
- Gender differentials, 184
- General Psychology, 146–147
- Genuine matching (GM), 245, 246, 267
- Genuine overeducation (GO), 246, 254
- Geographical distribution of skill mismatch, 300
- Graduate and non-graduate occupations in major groups, 1–4, 73–77
- Graduate jobs, 41, 57
  - concept of, 44–46
  - deployment of labor in, 63–65
  - distribution of, 63

- higher education system, role of, 65–67
- indicators of, 47–49
- Graduate job skills, 43, 45
- Graduate labor, demand for, 46–47
- Graduate labor market, 43, 46, 67, 110
- Hannah–Kay index, 137
- Harmonization of occupations
  - across waves of the national survey of college graduates, 170–171
- Heckman selection model, 3, 14
- Herfindahl Index, 136, 151, 219, 223
- Higher educated adult employees, OLS estimates of, 117
- Higher education, 7, 18, 42, 44, 45, 51, 53, 54, 55, 59, 60, 62, 65–67, 68, 177, 289, 296, 301
- Higher Education Requirement Index (HERI), 56, 57
- Higher Education Statistic Agency (HESA), 7, 19
- Higher skill mismatch, 202, 222
- History (college major), 144, 150
- Hourly wage, 59, 185, 186, 190
- Human capital, 173, 200, 203, 229
  - returns to, 174
- Human capital investment
  - and skill development, 349–351
  - skill mismatch and, 351
- Human capital theory (HCT), 86, 113, 208, 284, 349
- Human resource management, 336, 430
- Index of productivity in industry, 213
- Industry-level regression, 218, 239
- Inefficient signaling of skills, 282–283
- Informal learning, 300, 310, 321, 322, 324, 326, 347, 348, 350, 353, 357, 360, 366, 367, 369, 375, 380–382, 383, 384, 385, 388, 389, 390, 405
- Informal learning-on-the-job activities, 335
- Initial skill mismatches, 281, 367, 380, 388, 389, 390, 428
- International Adult Literacy Survey (IALS), 175
- International Standard Classification of Education (ISCED), 204
- International Standard Classification of Occupations (ISCO), 204
  - ISCO(HE)2008, 43, 54–58, 60
  - ISCO framework, 43
  - ISCO groups, 48
- Internet, 155, 417
- Inverse Mills ratio, 24, 268
- Italian National Institute of Statistics (ISTAT), 244, 252, 253, 268
- Job autonomy, 52, 329–333
