

INDEX

- Activities of daily living (ADLs), 230, 232, 266, 268, 270
- Affordable Care Act (ACA), 254, 262
- Aggregate demand, 4, 20
- Assets, 230
- Asymmetric information, 108, 112
- Balanced Repeated Replication method, 194
- Bayesian Information Criterion, 93, 94
- Bureau of Labor Statistics (BLS), 8
- Business cycle, 2, 4–6, 8, 9, 11–13, 15, 16, 19–21, 23, 25–27, 29–31, 33, 34, 36, 40, 41, 43
- Business cycle conditions
measure of, 8
promotion effects on, 79–80
- Candy Crush Saga*, 190
- Capital
human, 231
social, 127–162, 167–181
- Career Key, 135
- Center for Epidemiological Studies (CES-D), 234
- Centers for Disease Control and Prevention (CDC), 233
- Communication, 111
- Computer gaming
anticipated impact of, 189–192
cross-country visualization, 195–197
decomposition method, 199–202, 211–214
gender differences in, 185, 187–192, 199–201, 206, 209, 216, 218, 219
individual and family characteristics, 197–198
intense gaming, determinants of, 214–217
pooled analyses, 202–205
school variables, 198–199
within-school-year models, 206–211
- Concern for others, 128, 130, 132, 133, 138, 140, 141, 147–152, 155, 157, 160, 175–177
- Corporate social responsibility (CSR), 128, 155
- Current Population Survey (CPS), 3–8, 10–12, 14–15, 17–19, 22–24, 26–28, 30–35, 38, 39
- Outgoing Rotation Groups (ORG), 4
- Current Population Survey, 80
- Decennial Census 2000 (DC), 135, 137, 138, 140, 145–146, 152, 160
- Delaying, on wages, 108–112, 119–122, 125, 126
- Diablo III*, 190
- Dynamic simulation of health model, 239–240
- Effective ability, of the worker, 79
- Employment
racial differences in, 2–9, 11–23, 25, 29, 36–39, 43–53

- re-employment, 9, 20–21
- self-employment, 5
- see also* Unemployment
- Entertainment Software Association (ESA), 189–191, 195
- Factor analysis, 138, 175–177
- Fair Labor Standards Act, 57
- Fast track, of promotion, 74–79, 86, 89, 91, 94, 98, 101, 103, 104
- Functional area, impact on promotion, 74–76, 79–81, 91, 95, 99–105
- Gender differences, in computer gaming, 185, 187–192, 199–201, 206, 209, 216, 218, 219
- Gender math gap, 186–187, 189, 191, 196, 197, 205, 206, 209, 211, 216, 218
- Graduated minimum wage, 55–68, 71–72
 - noncompliance with, 57
 - optimal consumption with, 62–67
 - social welfare with, 60–62
 - social welfare without, 59–60
- Great Recession, 3–6, 9, 11, 12, 16, 19–21, 23, 25, 29, 36–43
- Gross Domestic Product, 5
- Gross national product (GNP), 5
- Guild Wars 2*, 190
- Health
 - index, 232–233, 268–270
 - insurance, 244–247
 - model, dynamic simulation of, 239–240
 - model, estimates of, 234–236
 - role in retirement, 229–266, 268–297
- states, transitions among, 236–237, 276–284
- status, retirement simulations in, 256–259
- structural modeling, 245, 266
- Health and Retirement Study (HRS), 230, 232–235, 239, 243, 247, 248, 252, 264, 268, 271–272
- Heterogeneity, in promotion, 74–80, 82, 89–104
- High-productivity workers, graduated minimum wage for, 56, 58–68, 72
- Human capital, 231
- Implicit contract model, 80
- Information and communication technologies (ICT), 184–187, 189, 192–194, 202–208, 210–211, 216–218, 224–225
- International Association for the Evaluation of Educational Achievement (IEA), 192
- International Telecommunications Union (ITU), 194
- Internet, 184–187, 189, 193–195, 197, 198, 205, 206, 209, 214, 216, 218
- Item response theory (IRT), 232–233, 269
- Job assignment model, 78, 79, 82
- Job title change, and promotion, 83, 85, 88
- Knowledge acquisition, 111
- Labor force transitions, 17–19
- Labor market conditions, and promotion, 101–102
- Labor market transitions
 - indicator for, 7–8
 - across labor force states, 25–36

- monthly probabilities, 21–25
 - racial differences in, 1–43, 45–53
- Labor supply, 230, 240, 241
- Layoffs, 243
- Leisure, 231
- Linear probability model (LPM), 12, 19, 20, 36
- Lower body mobility, 232
- Low-productivity workers, graduated minimum wage for, 56–68
- Market-based tournament model, 108, 109, 111, 121
- Massively multiplayer online (MMO) games, 185, 187, 189, 192, 195, 199, 209–214, 218
- Math test scores, gender gap in, 186–187, 189, 191, 196, 197, 205, 206, 209, 210, 214, 216, 219
- Medical conditions, 233, 271
 - changing, effects of, 264
 - groups, transitions among, 237–239
 - personal characteristics affecting, 234, 271–276
- Medical expenditures, 244–247, 285–286
- Medicare, 245–247
- Minority, 2, 3, 7, 9, 11, 15, 16, 20, 25, 29, 38, 39, 43
- Music downloading, 184–186, 195
- National Bureau of Economic Research (NBER), 2
- National Center for Health Statistics, 233
- National Death Index, 235
- National Health Interview Survey, 233
- National Longitudinal Survey of Youth (1990), 81
- Natural rate of unemployment (NRU), 8
- Noncompliance, with graduated minimum wage, 57
- Nonpublic data, 129
- Nonsocial occupations, 128–130, 134, 140, 142–143, 159–162
 - classification of, 135–136, 167–169
 - sample means, 145–147
 - selection of, 142–143
 - wages in, 153–158
- Nursing home expenditures, 247–248, 287–288
- Occupational choice, 128–130, 133–134, 139–141, 147, 151, 157, 162
 - expected wage differentials in, role of, 144
 - structural equation, 158–160
- Occupational Information Network (O*NET), 136, 169–173
- Optimal income taxation, 63
- Organization for Economic Cooperation and Development (OECD), 192, 194
- Pain, 232
- Panel Study of Income Dynamics, 80
- Pareto improvement, in optimal income taxation, 56, 64
- Pay grade advancement, and promotion, 83, 86–88
- Proclivity, 234
 - retirement simulations in, 259–262
- Program for International Student Assessment (PISA), 184–186, 188, 189, 192–195, 197–199, 202–204, 206–213, 216–217, 223–227, 228

- Progress in International Reading Literacy Study (PIRLS), 192
- Promotion
 defined, 81
 determinants, in corporate hierarchies, 73–105
 econometric model, 89–94
 in economics literature, 77–80
 effect on business cycle conditions, 79–80
 fast track of, 74–79, 86, 89, 91, 94, 98, 101, 103, 104
 functional area's impact on, 74–76, 79–81, 91, 95, 99–105
 heterogeneity in, 74–80, 82, 89–104
 labor market conditions and, 101–102
 self-reported, 82
- Racial differences, in labor market transitions, 1–43, 45–53
- Racial unemployment gap, 4–6
- Randomized control trials (RCT), 187
- Reduced-form probit estimation, 178–179
- Re-employment, 9, 20–21
- Retiree health insurance, 245–246, 254, 265
- Retirement, role of health in, 229–266, 268–297
 basic retirement and saving model, 240–243
 budget set elements, 248–249
 dynamic simulation of health model, 239–240
 estimation, 251–254
 health index, 232–233, 268–270
 health model, estimates of, 234–236
 layoffs, 243
 medical conditions, 233, 271
 medical expenditures and health insurance, 244–247, 285–286
 nursing home expenditures, 247–248, 287–288
 personal characteristics and proclivities, 234, 271–276
 simulations, 254–264, 288–297
 Social Security Disability Insurance, 243–244, 265, 284–285
 solutions, 250–251
 specification and constraints, 240–249
 stochastic specification, 249–250
 transitions among health states, 236–237, 276–284
 transitions among medical condition groups, 237–239
- Robustness tests, 160–161
- Self-employment, 5
- Self-reported health, 232
- Self-selection, 128, 129, 133, 144, 187, 202
- SIMS* 3, 190
- Single-player games (SPGs), 185, 187, 189, 194–195, 209, 211–213, 218
- Slot constraint, 109, 124
- Sociability, 128–130, 132, 134, 136, 138, 140, 141, 148–152, 154–155, 157, 160, 161, 173, 175–177
- Social capital
 defined, 130–131
 estimation of, 137–139, 148–153
 potential endogeneity of, 144
 role in wage determination, 127–162, 167–181
- Social Capital Community Benchmark Survey (SCCBS), 137–138, 144, 152

- Social occupations, 128–130, 134, 140, 159–162
 - classification of, 135–136
 - sample means, 145–147
 - selection of, 142–143
 - wages in, 153–158
- Social occupations, wage
 - determination in, 127–162, 167–181
 - challenges and solution, 136
 - implications of, 161–162
 - occupational choice, 133–134
 - robustness tests, 160–161
 - social and nonsocial occupations, 135–136, 153–158
 - social capital, 130–133, 137–139, 148–153
 - structural occupational choice equation, 158–160
 - switching regression model, 140–147
- Social Security Disability Insurance (SSDI), 243–244, 265, 284–285
- Social welfare, 56–59
 - with graduated minimum wage, 60–62
 - without graduated minimum wage, 59–60
- Spot market model, 80
- Structural modeling, 245, 266
- Swimming upstream factor, 187–189, 218
- Switching regression model, of
 - occupation wages with selection, 128, 134, 135, 140–147
 - sample means, 145–147
 - social and nonsocial occupations, 142–143
 - social capital, potential endogeneity of, 144
 - social occupation wage differential, decomposition of, 143–144
- Technology
 - change, 121
 - and wage distribution, 119–121
- Three-layer model, 116–119
- Tournament, 108, 111, 114–116, 121, 124
 - theory, 82
- Trends in International Mathematics and Science Study (TIMMS), 192
- Two-layer model, 113–116
- Unemployment, 80
 - exit rates, 12, 21
 - racial differences in, 2–23, 25, 29, 36–39, 43–53
 - see also* Employment
- Universal health insurance, simulations of, 262–263
- Upper body agility, 232
- Wage(s)
 - delaying on, 108–112, 119–122, 125, 126
 - distribution, 107–122, 124–126
 - inequality, 111, 121
 - technology effect on, 119–121
- Wage determination, in social occupations, 127–162, 167–181
 - challenges and solution, 136
 - implications of, 161–162
 - occupational choice, 133–134
 - robustness tests, 160–161
 - social and nonsocial occupations, 135–136, 153–158
 - social capital, 130–133, 137–139, 148–153

- structural occupational choice
 - equation, 158–160
 - switching regression model, 140–147
- Welfare-to-Work Tax Credit
 - program, 57
- Work Opportunity Tax Credit
 - program, 57
- World Bank Indicators, 193
