

INDEX

- Abstract idea doctrine, 60–61
- Advanced analytics, 35–37
- Alice Corp.*, 2, 61
- Alice Corp. v. CLS Bank International*, 60
- Antitrust implications, 178–180
- Artificial intelligence (AI), 2, 60
 - abstract ideas in, 60–62
 - patenting under uncertainty, 62–65
- Asset management companies (AMCs), 191–192
 - as evaluators, 191–192
- Banking, 190
- Behavioral economics, 32
- Big data, 4, 30
- Big Four banks, 191, 193, 197
- Californian Consumer Privacy Act of 2018 (CCPA), 31, 36
- Central Data Protection Principles of European, Indian, and Californian Data Protection Law, 47–52
 - control and information rights, 48–50
 - deidentification policies, 50–52
- Check-the-box rules, 110
- China
 - Big Four banks, 191, 193, 197
 - economic development, 190
 - nonperforming loans and asset management companies, 191–192
- Complete monitoring, 109
- Compliance, 110
- Conformity costs, 39
- Cost of compliance, 112–113
- Court of Justice of the European Union (CJEU), 36–37, 50–51
- Cumulative distribution function (CDF), 122
- Data, 4
 - minimization, 50
 - protection, 1–2, 43, 52
- Deadweight loss (DWL), 132–133, 135–136
- “Deidentification” policy, 46–47, 50, 52
- Digital communication technologies, 4
- Digital subscriber-line (DSL), 173
- Displacement ratio, 175
- Downstream price floor protects
 - against vertical price squeeze, 175
 - downstream P-F constraint, 175
- “Dual-track” development program, 191
- Economic regulation implications, 178–180
- Efficient component pricing rule (ECPR), 175
- Efficient markets
 - market prices, 89–90
 - prices display, 88–89
 - properties of, 86–91
 - security price movements, 86–88
 - valuation efficiency, 90–91
- Ex ante materiality test, 99–100
- Forecastability, 96
- Foreign-invested banks, 193–195

- Formal characterization
 - of simple informational efficiency, 98–99
 - of valuation efficiency, 99
- Formal model, 98
- Fraud on the Market (FOTM), 84, 86
- “Free information” policy, 45–46

- General Data Protection Regulation (GDPR), 4, 31, 36–37, 51
- Generalization of Samuelson’s theorem, 101–103
- Grant and rejection of patent applications, 71–74

- Horn’s parallel analysis, 78

- Incomplete monitoring, 111
 - high compliance cost, 127–130
 - literature, 115–117
 - lower compliance costs, 130–132
 - market effects, 132–137
 - model, 112, 117, 125
 - results, 125–137
- Informal lending, 195–196
- Informational efficiency, 91–92

- Joint-hypothesis problem, 90–91

- Knowledge discovery in data (KDD), 30, 36, 41
- Knowledge gain, 43–52

- Law and economics, 172, 191
- Legal norms, 110, 116
- Legal standards, 112
- Liberty, 109
- Linkline*, 173

- Market effects, 132–137
- Market efficiency in 10B-5 litigation, 83–85
 - efficiency properties in securities fraud litigation, 93–97
- formal characterization of efficiency properties, 98–104
- informational vs. valuation efficiency, 91–92
- properties of efficient markets, 86–91
- Market prices, 89–90
- Materiality, 86–87
- “Maximum privacy” policy, 46
- Myopic consumers, 4–5
 - market for data, 9–15
 - market regulation, 15–22
 - model, 6–8
 - no market for data, 8–9

- Negative liberty, 38
- Non-exclusionary price floors
 - assumptions, definitions, and notation, 174–175
 - downstream price floor protects against vertical price squeeze, 175
 - policy implications, 178–181
 - two-sided safe harbor, 176–178
 - upstream price floor protects against nonprice discrimination, 175–176
- Noncompliance, 110
- Nonforecastability, 90
- Nonperforming loans (NPL), 191–192

- Optimization of trade-offs, 43–52

- P2P lending, 195–196
- Patent Act, 60
- Patent Examination Data System (PEDS), 62–63
- Patent Subject Matter Eligibility Guidance, 68–69
- Patent Trial and Appeal Board, 61–62
- Patent(s), 2
 - claim, 60
 - eligibility, 60–63
 - legislation, 60
 - policy, 66

- Patentable subject matter, 60–61
- Pattern day trader, 97
- Penalty, 110
 - multiplier, 112, 115–116
 - regime, 114
- Permitted noncompliance, 111
- Personal data, 30
 - use of, 30
- Personal Data Protection Bill (PDP Bill 2019), 31, 2019
- Price discrimination, 5, 7–8
- Price squeeze, 172, 175
- Price-floor constraints (P-F constraints), 172
- Privacy, 1–2, 4, 30–31, 43, 52, 109
 - regulation, 6
 - self-management, 49–50
 - as vulnerability protection, 31–42
- Private banks, 193–195
- Purpose limitation, 50
- Puzzles, 190

- Regulated parties, 117
- Regulation, 4
- Regulators, 109, 111
- Reliance, 84
- Retail displacement ratio, 175
- Right to be forgotten, 4–5, 16, 19
- Right to be informed, 4–5, 15–16
- Right to erasure. *See* Right to be forgotten
- Risk, 32
 - of harm, 43–52
- Risk-neutral probability
 - derivation of, 103–104
 - function, 104
- “Risk-neutral” distribution, 103
- Rules and standards, 111, 113, 115–116
- Ruling out securities price
 - forecastability, 100–104

- Sabotage, 172
- Safe harbor margin ratios, 177–178
- Samuelson’s nonforecastability theorem, 100–101

- Securities fraud litigation, 2
 - current practice in, 93–94
 - efficiency properties in, 93–97
 - extensive informational efficiency, 95–96
 - market prices, 96
 - plaintiff believes market prices, 96–97
 - violations of law of one price, 94–95
- Securities law, 190
- Security price movements, 86–88
- Shadow-banking, forms of, 196–197
- Sherman Act, 172
- Social norms, 116
- Sophisticated consumer, 4–6
- State’s governance model, 190
- Substantial authority, 114
- Supreme Court, 61
- Surplus, 4–5

- Time-consistent decisions, 8
- Traditional banks, 196
- Trinko*, 173
- Two-part test, 61–62
- Two-period model, 6
- Two-sided safe harbor, 176–178
 - safe harbor margin ratios, 177–178

- Uncertainty, 41–42, 62
 - patenting under, 62–65
 - score, 74–81
- Undercompliance, 111
- United States Patent and Trademark Office (USPTO), 62–63
- Upstream price floor protects against nonprice discrimination, 175–176
 - upstream P-F constraint, 176

- Valuation efficiency, 90–92
- Vertical Merger Guidelines (VMGs), 178, 180–181
- Vertical mergers, 180
- Vertically integrated firm (VIF), 172–173

- Vulnerability protection, 30
 - costs related to data use interferes with privacy, 37–39
 - differences to informational perspectives, 33–35
 - privacy as, 31–42
 - scope and limits of privacy in context of commercial data exploitation, 35–37
 - social amplification and catastrophic outcomes, 41
 - uncertainty, 41–42
- Wealth management products, 197
- WeBank, 194–195
- Wholesale displacement ratio, 175
