

ACKNOWLEDGEMENTS

June 13 to June 17, 1998 the fourth conference on "Panel Data and Structural Labour Market Models" was held at Sandbjerg, a manor house owned by the University of Aarhus. The conference was organised by the Centre for Labour Market and Social Research.

The scientific programme of the conference was prepared by a committee consisting of the editors.

After the conference all papers have been subjected to a refereeing process, where papers have been sent to one or two referees chosen among the participants.

Financial support from The Danish Social Science Research Council and the Danish National Research Foundation is gratefully acknowledged.

We are most grateful to the programme committee, the funding organisation, the speakers and all the participants for their contributions and for their participation in the refereeing process of the papers included in this volume. Especially we want to thank Mrs. Kirsten Stentoft for her eminent organisation of the conference and subsequent work preparing this volume including her patience with the authors and the editors.
