CONTENTS

About the Authors ix

Advancing the Field of Immigration and Health
*Reanne Frank, Erick Axxe, Coralia Balasca and
Melissa Rodriguez* 1

PART I CROSS-NATIONAL PERSPECTIVES

**Reconsidering the Relationship between Age at Migration and
Health Behaviors among US Immigrants: The Modifying Role
of Continued Cross-border Ties**
Jacqueline M. Torres, Annie Ro and May Sudhinaraset 17

**Structure, Culture, and HIV/STI Vulnerabilities among
Migrant Women in Russia**
Victor Agadjanian and Natalia Zotova 47

PART II PROBLEMATIZING ACCULTURATION

**Socioeconomic Status and Acculturation: Why Mexican
Americans are Heavier than Mexican Immigrants and Whites**
Michelle L. Frisco, Molly A. Martin and Jennifer Van Hook 71

**Intergenerational Health Transmission among Mexican
Americans: Further Evidence of the Protective Effect of
Spanish-language Utilization**
Brian Karl Finch 97

**Talking about Teeth: Egocentric Networks and Oral Health
Outcomes in a Mexican American Immigrant Community**
Erin Pullen, Brea L. Perry and Gerardo Maupome 105

**The Influence of Acculturation and Weight-related Behaviors on
Body Mass Index among Asian American Ethnic Subgroups**
Chih-Chien Huang 123

**PART III
STRUCTURAL APPROACH**

The Immigrant Health Differential in the Context of Racial and Ethnic Disparities: The Case of Diabetes <i>Michal Engelman and Leafia Zi Ye</i>	147
The Effects of Perceived Discrimination on Immigrant and Refugee Physical and Mental Health <i>Magdalena Szaflarski and Shawn Bauldry</i>	173
“They See Us Like Trash”: How Mexican Illegality Stigma Affects the Psychological Well-being of Undocumented and US-born Young Adults of Mexican Descent <i>Deisy Del Real</i>	205
Immigrant Exclusion and Inclusion: The Importance of Citizenship for Insurance Coverage Before and After the Affordable Care Act <i>Erin Ice</i>	229
Precarious Incorporation: The Role of Work in Migrant Health and Longevity <i>Nathan T. Dollar</i>	251
Inflammation among Children: Evidence of an Immigrant Advantage? <i>Kammi K. Schmeer</i>	275
<i>Index</i>	297

ABOUT THE AUTHORS

Victor Agadjanian is a Professor of Sociology at the University of California – Los Angeles. His research has examined migration, sexual and reproductive health, gender, ethnicity, and religion in developing and transitional settings. He has directed large projects in sub-Saharan Africa and Central Eurasia and has published in several languages in leading international outlets.

Erick Axxe is a Graduate Student in Sociology at the Ohio State University and a Student Affiliate of the Institute for Population Research. His research focuses on immigrant identity and integration. In particular, his work focuses on the structures which influence social trust in communities.

Coralia Balasca is a Doctoral Student in the Department of Sociology at the Ohio State University and an Affiliate of the Institute for Population Research (IPR). Her research focuses on the intersection of health and migration with a focus on health disparities in contemporary national and international contexts.

Shawn Bauldry is an Associate Professor of Sociology at Purdue University. His research has explored the interrelationships between socioeconomic resources and health over the life course and across generations. His work has been published in the *Journal of Health and Social Behavior*, *Social Science & Medicine*, and other scholarly journals.

Chih-Chien Huang is an Assistant Professor in the Department of Sociology at Saint Anselm College. Her current research projects focus on health perceptions among Asian Americans. Professor Huang's areas of expertise include socioeconomic determinants and gender disparities in the prevalence of Chinese obesity, Asian American body weight disparities, and the role of health behaviors in contributing to obesity.

Deisy Del Real is a PhD Candidate in Sociology at the University of California, Los Angeles. Her research seeks to understand the negative consequences of immigration enforcement and to identify policy solutions from other parts of the world that can help us create more humane immigration laws.

Nathan T. Dollar is a Graduate Student in Sociology at the University of North Carolina at Chapel Hill and a Pre-doctoral Trainee at the Carolina Population Center. His research focuses on international migration and the effect of labor market segmentation on the health and mortality of migrant populations in the United States. His work also examines how geographic variations in political and economic context shape population health outcomes.

Michal Engelman is an Assistant Professor of Sociology at the University of Wisconsin-Madison and a Faculty Research Associate at the Center for Demography and Ecology and the Center for Demography of Health and Aging. Her research examines the patterns of health throughout the life course and connections between social disadvantage and disparities in health.

Brian Karl Finch, PhD, is a Research Professor of Sociology & Spatial Sciences, Director of the Southern California Population Research Center, and Senior Social Demographer at the Center for Economic and Social Research at the University of Southern California.

Reanne Frank is an Associate Professor of Sociology at the Ohio State University and faculty affiliate of the Institute for Population Research (IPR). Her active research agenda centers on the sociology of immigration and race/ethnic inequality with a focus on demographic and health outcomes.

Michelle L. Frisco is Associate Professor of Sociology and Demography at Penn State University. Her research is aimed at better understanding the intersection of young people's family lives, school experiences and health and well-being and how racial/ethnic and nativity health inequalities emerge over time.

Erin Ice is a Doctoral Student at the University of Michigan in the Department of Sociology and Pre-Doctoral Trainee at the Population Studies Center. Her research focuses on health sector correlates of health and aging disparities, currently analyzing how changes in insurance billing practices have influenced invasive preventative technology use.

Molly A. Martin is an Associate Professor of Sociology and Demography at Penn State University. Her research seeks to understand how inequalities are produced and reproduced across generations by bridging areas of sociology of families, social stratification, medical sociology, and demography.

Gerardo Maupomé has been a Professor with Indiana University since 2005, more recently in the Richard M. Fairbanks School of Public Health as Associate Dean of Research. His research interests include oral epidemiology, dental health services research, oral health disparities, and analysis of decision-making among dental professionals.

Brea L. Perry is a Professor of Sociology at Indiana University. Her research interests include social networks, medical sociology, and education. She has published over 50 peer-reviewed articles and has been funded by NIH and NSF. Her book, *Egocentric Network Analysis: Foundations, Methods, and Models*, was published in 2018.

Erin Pullen is an Assistant Research Scientist at the Indiana University Network Science Institute. Her work investigates how relationships between personal networks, health behaviors, and health outcomes co-evolve over time, especially in

the context of disadvantage. In particular, her work focuses on the ways intersectional inequalities shape networks and health.

Annie Ro is an Assistant Professor in the program in Public Health at UC Irvine. She is a health demographer who studies social determinants of immigrant health, focusing on country of origin factors, adaptation processes, and immigrant receiving contexts among adult Latino and Asian immigrants.

Melissa Rodriguez is a Graduate Student of Sociology at the Ohio State University and a Student Affiliate at the Institute for Population Research. Her research focuses on US–Mexico migration and Latinos’ experiences in the United States. Her work also examines race and class variations in educational experiences and trajectories.

Kammi K. Schmeer is an Associate Professor in the Sociology Department at the Ohio State University. Her research focuses on how family contexts affect children’s health and physiological stress in the US and in low-income countries. She is also an Affiliate of the Institute for Population Research at Ohio State.

May Sudhinaraset is an Assistant Professor in Community Health Sciences in the School of Public Health at UCLA. Her research focuses on understanding the social determinants of migrant and women’s health including cultural contexts of vulnerable populations, quality of care globally, and social policies and immigration in the United States.

Magdalena Szaflarski is an Associate Professor of Sociology and Scientist in Medicine and Public Health at the University of Alabama-Birmingham. Her research interests include immigrant mental health, religion and HIV, health-related quality of life, and medical cannabis use. Her research has been funded by NIH, state agencies, and private foundations.

Jacqueline Torres is an Assistant Professor in the Department of Epidemiology & Biostatistics at UCSF. Her research examines the impact of social and policy factors on the health of migrants and their family members.

Jennifer Van Hook is Roy C. Buck Professor of Sociology and Demography at Penn State University and a Non-Resident Fellow at the Migration Policy Institute. Her work focuses on immigrant populations and the socioeconomic integration of immigrants and their children, including the health and well-being of immigrants and their children.

Leafia Zi Ye is a Doctoral Student in Sociology at the University of Wisconsin-Madison and an Affiliate of the Center for Demography and Ecology. Her primary research interests are immigrant assimilation and social determinants of well-being. She currently has two streams of work: one stream focuses on immigrants’ health and earnings trajectories and the other on family structure and the well-being of children in immigrant families.

Natalia Zotova is a PhD Candidate at the Ohio State University. She is a Cultural Anthropologist who studies migration and health and focuses on migration from Central Asia to the US and Russia. Her work explores the experiences of migrants and the resources and social networks that they use while accommodating to a new setting, as well as their perceptions of stress and insecurity both in the countries of origin and destination. She also researches implications of transnational migration for the physical and psychological well-being of movers and their families.
