

INDEX

- Accounting research, 53
 - behavioral, 64
- Accounting-based earnings
 - management, 48, 50–55, 60
- Actual performance, 104, 114–116
- Additional determinants of investor behavior, 62
- Air conditioning services, 91
- Analysis of Covariance. See ANCOVA
- ANCOVA (Analysis of Covariance), 11–12
- Anecdotal biases, 129–132, 134–135, 137–139
- Anecdotal data, 128–129, 131–132, 137–139, 141
- ANOVA for re-examine Strategy, 110
- Assessments, subsequent, 72–74, 82–83
- Assurance services
 - providing, 70–71, 73, 82
 - subsequent, 70, 72, 74–75, 79, 82–85
- Attitude-behavior relation, 51
- Attitude-behavior research, 51
- Attitudes, negative, 49
- Attractive/accounting earnings
 - management correlation, 63
- Balanced scorecard, 98
- Behavior
 - attitudes influence, 51
 - investing, 47–50, 51–52, 54, 56, 58–60, 63–64
- Behavior results, 54
- Behaviors
 - budgetary, 14
 - opportunistic, 2
- Beneficial/operational earnings
 - management correlation, 63
- Biases, 128, 131, 135, 137–139, 141
- BSC, 98, 101, 103–106, 112, 114–120, 126
- Budget committee, 9
- Budget reliability, 6
- Budget targets, individual, 8–9
- Budget-setting process, 2, 4, 7, 9, 16
- Budgetary-slack creation, 1, 3–5, 12–13
 - reducing, 12, 15
- Budgets, 3–6, 8, 16
 - reliable, 16
- Business processes, internal, 101, 107, 113, 120
- Business unit, 76, 78, 89–91
- Capital budgeting decision, 128, 131–132, 138
- Cases, employee classification, 29
- Cell mean contrast tests, 110, 113, 116
- Cells, 7, 11–12, 15
- Chi-square test, 33–15
- Chinese participants, 117–118
- Class, graduate management
 - accounting, 106
- Classy's strategy, 104, 106, 119
- Company's earnings management
 - method, 56
- Control deficiency assessments, 71, 75, 82
 - internal, 79
- Control deficiency classifications, 75
- Control deficiency, identified, 90
- Control, mutual-monitoring, 1–3
- Creation of budgetary slack in
 - low-need achievers, 14, 16

- Decisions
 - court, 21, 26–7
 - employee classification, 29
 - final, 30, 32
 - judge's, 30
 - judicial, 26, 30, 32
 - memorandum, 30
 - regular, 30
- Decomposition aid, 109
- Deficiency, unresolved, 91
- Descriptive Statistics, 108, 113–114
- DESIGN condition, 75, 78, 81
- Design deficiency, 74, 90
 - identified, 85
- Design effectiveness, 71, 74–75, 84–85
 - assessing ICFR, 71
- Design ICFR, 73
- Driver, strategic, 101, 106, 116, 126
- Driver-poor outcome pattern
 - good, 99–100, 111
 - poor, 100, 111–114, 116–117
- Driver-poor outcome performance pattern
 - good, 111–114, 117, 119
 - poor, 99–100, 111–112, 114
- Earnings management
 - operational, 56, 58
 - prospective investor accounting, 58
 - term, 50, 56, 65
- Earnings management behavior, 48, 54
 - decipher, 48
 - drive, 64
- Earnings management methods, 48–44, 52, 54–56, 60–65
- Earnings management scenarios, 55, 64
 - accounting, 60, 65
- Earnings management strategies, 50–51, 53–54, 57, 61
 - company's, 60
- Earnings per share (EPS), 55
- Earnings, company manages, 51
- Effect of earnings management and investor role, 58–59
- Effectiveness, operating, 71–72, 74–75, 84–85
- Effects of decision aids on re-examine strategy, 110
- Employee FICA, 23
- Employee independent contractor
 - total, 34, 36
- Employer–employee relationship, 23, 25, 36
- Employer FICA, 23
- EPS (earnings per share), 55
- Evaluations, subsequent, 70, 72–74
- Experimental condition study, 108–109, 114–115
- Experimental conditions, 71, 80–82, 85
- Experimental research design, 72
- Factors, significant, 29–10, 33
- Federal Unemployment Tax. See FUTA
- Fiscal/accounting earnings
 - management correlation, 63
- FUTA (Federal Unemployment Tax), 22, 25, 36
- Good driver-poor outcome condition, 113–116, 120
- Group decision making, 1
- GS Enterprises, 89–91
- Helping management design controls, 70
- High-need achievers, 5–6, 14–16
- Hypothesis Testing Planned Contrast, 81–82
- ICFR, 70–73, 78, 84
 - effectiveness of, 72, 78, 84
- Independent contractor relationship, 24
- Individual judgement/decision making, 71, 75, 82

- Informative statistical data, 138
 Informative value, 137–138
 Internal audit experience, 76–77
 Internal audit team, 70, 78, 89, 91
 Internal auditor participants, 76
 Internal control deficiency, 75–76, 79, 81–82, 91
 Internal control deficiency evaluations, 72
 Internal control deficiency manipulation, 78
 Internal control design, 90–91
 Investment behavior, 48–52
 Investment decisions, 48–50, 53, 55–56, 59, 62
 Investor attitudes non-professional, 48
 Investor behavior, drive, 52
 Investor role and method of earnings management, 60
 Investor's likelihood, prospective, 56
 Investors, institutional, 48
 Investors' attitudes and behaviors, 49

 Judge gender, 21, 29, 32, 34–35 and political affiliation, 32
 Judges, democratic-appointed, 29–30, 32
 Judgment orientation, 133–134, 136–137 statistical, 139
 Judgment orientation conditions, 135, 137, 139
 Judgment orientation decision-aid, scientific, 138
 Judgment orientation II condition, 133–134, 136, 137
 Judgment orientation intervention, scientific, 129, 137

 Likelihood assessments, 80
 Likelihood of Concluding MW Assessments, 79, 81
 Linked strategic drivers, 117
 Low-need achievers, 6, 14–16

 Management responsibility, 70, 72–73, 84
 Management system, strategic, 120
 Managerial judgment, 117–118
 Material weakness. See MW
 Mean for re-examine strategy, 109 for re-examine subordinates, 109
 Mean performance ratings, 107
 Mean ratings, 120
 Measures, strategy-linked, 120
 Median likelihood, 81
 Method, scientific, 133–135, 137
 Model, three-factor, 33
 Monitoring control tools, 6, 14
 Motivational biases, 100, 118
 Mutual monitoring effectiveness of, 15–16 effects of, 1, 5, 11, 15 joint effects of, 12, 15 role of, 14

 MW (material weakness), 70–72, 74–82, 84, 90

 National Employment Law Project, 22
 Non-professional investors examining, 50 attitudes, 51, 53, 55, 57, 59, 61, 63, 65 understanding of earnings management, 58

 On-professional investors' attitudes, 49
 Operational-based earnings management, 48–60, 51–52, 54, 59–60, 65
 Organizational behaviour, 5, 15

 P-values, 33–15, 58–60, 65, 77, 80–82, 110, 116
 Participants Choosing Machine, 136
 Participants' attitudes, 56

- PCAOB (Public Company Accounting Oversight Board), 72, 77, 84–85, 97
- Peers, 2, 15
