INDEX

A118G, 295, 303–304
Accounting information, distress prediction using, 106–107
Accounting judgments and decisions, 325–326
Accounting numbers, literature questioning reliability of, 107–108
Accounting profession, 270
Accounting researchers, 1–2
Accounting-related scandals, 351
Adjusted gross income (AGI), 149
Affective professional commitment (APC), 270–271
Age, 13–14, 16
  narcissism and, 4–5
Age differences in managers' responses to narcissistic subordinates' aggressive accounting
  aggressive accounting via estimates, 5–6
  comprehension checks, 9
  dependent variables, 8–9
  hypotheses development, 4–6
  identification of subordinate narcissism, 12
  inventory value ANOVA, 17
  manager descriptive statistics, 9
  manipulation check, 9–13
  MANOVA of responses to statements about subordinate, 11
  meet or beat behavior, 16–17
  methodology, 6–9
  moderated mediation, 15
  narcissism and age, 4–5
  narcissism in workplace, 4
  participant recruitment, 6
  predicting manager inventory values, 13
  procedure, 6–7
  results, 9–17
  subordinate narcissism manipulation, 7–8
  tests of hypothesis, 13–16
Aggressive accounting via estimates, 5–6
Agreeableness, 328–329
American Institute of Certified Public Accountants (AICPA), 26, 85, 87
Analysis of variance (ANOVA), 92
Analysis tools and controls, 220–221
Appraisal, 201–202
Approval process, 6
Asian economies, 44
Assembled centrality score, 367
Assembled map, 362–363, 365
Assurance, 85–87
Assurance Services Executive Committee Emerging Assurance Technologies Task Force, 85
Auditors, 28–29, 196–197, 298
  choice, 30–31
  size on creditworthiness, 31
Audits (*see also* Voluntary audits), 296–298
  fees mechanisms, 29
  firm's reputation, 260
  quality, 30–31
  reporting quality, 29
Authoritarianism, 325–326, 335–336
Autonomy, 173
Average variance extracted (AVE), 57
  statistics' square root, 57–59

Back-to-back translation, 55

Bag-of-words (BoW), 112–114, 125
  classification using, 123–125
Behavioral tendencies, 292
Belief Adjustment model (BA model), 83–84, 92
Beliefs, 272–273
Between-subjects 2 x 2 experimental design, 261
Big Five, 325–326, 328–329
Big4 (brand name), 26–27
  auditors, 31, 38
  effect, 31
Binary frequency, 113–114
Budget resources (BR), 185
  adequacy of, 174–176
Budgeting, 52, 174–175, 335–336
Burnout, 196
Business Environment and Enterprise Performance Survey (BEEPS), 301–302

Callousness, 11
Cash flow
  ratios, 106
  variable, 106–107
Categorization, 147, 149, 152
Causality, 362
Central concept, 366
Centrality analysis
  of collective map, 367–368
  of individual maps, 366–367
Certified Public Accountants (CPA), 84–85, 327–328, 334
Challenge stressor, 201
Chi-square test, 88–89
Chief audit executive (CAE), 361, 364–365
Chief financial officer, 31–32
China's national culture, 46
Chinese management practices, 46
Chinese SOE, 50
Class labeling, 110–112
Classification modeling, 120–122
  using machine learning, 114–116
Client acceptance process, 30
Client creditworthiness, 30–31
  LLA and, 30
CMAP 2, 365
Coding, 210
Cognitive categorization, 147
Cognitive mapping method, 350, 353
  application, 363–366
  methodology, 361–363
Cognitive-relational model of stress appraisal, 222
Cohen's kappa coefficient, 220–221
Collective cognitive map, 362
Collective efficacy, 354–355
Collective map, 362–363
Collective mental representation, 365–366
Collectivism, 292–293
Collectivist culture, 292
Commercial lenders, 258
Commercial lending
  decisions, 259
  officers, 30
Commercial loan officers, 261
Comparative Fit Index (CFI), 220
Competitive aggressiveness, 173
Composite map, 362–363
Comprehension checks, 9
Conditional probability models, 106–107
Confidence intervals, 219
Confirmatory factor analysis (CFA), 277–279
Confounding variables, 302–304
Conscientiousness, 328–329, 357
Content analysis of semi-structured interviews, 368–373
Content words, 113
Contingency framework, 170
Continuance professional commitment (CPC), 270–271
Contrast effect, 92–93
  analysis to assess contrast effect, 90
Control variables, 57
Conventional personalities, 340
Convergent validity of variables, 57–59
Corporate communications, 104–105

importance of, 112
information-rich content of, 130–131
tone of, 105, 114
Corporate failure, 108
early warning signals of, 130–131
Corporate social responsibility (CSR), 87
Credibility intervals, 219, 222
Creditors, 26
Creditworthiness, 34
interactive effects of LLA disclosure and auditor size on, 31
Cronbach alphas, 276–277, 280–281
Cross-validation methodology, 115
Cultural psychologists, 292
Culture, 208–209, 292, 298–299
Current asset position (CAP), 140–141, 144, 146, 152
Cynicism, 11

Dark Triad, 336–339
components of narcissism, 325–326
Data collection method, 55, 110, 112, 177–178, 363–364
Debt to total asset ratios, 106
Deceptive impression management techniques, 4
Decision Explorer®, 365, 367
Decision latitude, 201
Demographic information, 57
Deoxyribonucleic acid (DNA), 294–295
Dependent variables, 8–9, 32
Descriptive statistics of participants, 57
Deterrence approaches, 140
Discriminant analysis, 106–107
Discriminant validity, 57–59
Distress prediction using accounting information, 106–107
Distressed firms from market-based variables, identifying, 108
Divisional profitability, 52
Domain stakeholders, 131
Dual inheritance theory (*see* Gene-culture coevolution theory)

Early warning signals in non-numeric communication channels
classification modeling using machine learning, 114–116
classification using BoW, 123–125
classification using tone of communication, 125–127
creating features using text mining, 112–114
data collection and class labeling, 110–112
distress prediction using accounting information, 106–107
identifying distressed firms from market-based variables, 108
interpretability, 116, 128–130
literature questioning reliability of accounting numbers, 107–108
multi-class classification, 127–128
predictability, 120, 122, 130–131
relevant literature, 106–110
research methodology, 110–116
results and findings, 116–128
sample selection procedure for loser firms, 111
sourcing textual information through ER, MDA NTA, and IAR, 112
using text to study firms, 108–110
Earnings Management (EM), 104–105, 107
practices, 107–108
researchers, 107–108
Earnings Release (ER), 105, 112
sourcing textual information through, 112
Econometric modeling, 105
Effect of organizational commitment and budgetary support, 170

literature review and hypotheses development, 172–176
research design, 177–180
results, 180–186
Employee, 170
narcissism, 4
Engineering approaches, 199–200
Ensemble learning technique, 128
Enterprising personalities, 340
Entrepreneurial orientation (EO), 170, 172–173, 179
European Bank for Reconstruction and Development (EBDR), 301–302
European Confederation of Institutes of Internal Auditing (ECIIA), 352
European Parliament, 80
European Union (EU), 80
Directive, 89
Eustress concept, 196
Executive development program (EDP), 55
Executive Master of Business Administration (EMBA), 55
Expectancy theory, 222
Expected asset position (EAP), 140–141, 146, 152
Expected utility theory, 142
Expenses, 116–120
Exploratory factor analysis (EFA), 277–278

F-measure, 122
Factor analysis, 276
Familiar/Negative Association (FNA), 261
Familiar/Positive Association (FPA), 261
Familiarity with loan applicant's auditor, 258–261
development of hypotheses, 259–261
experimental design and task, 261
previous literature, 258–259
research participants, 261
results, 262–264
Fear, 350
Federal Financial Institutions Examination Council, 28–29
Female public accountants, 341
Field study, 141
literature review and hypothesis development, 142–149
method, 149–152
results, 153–156
Finance corpus, 114
Financial measures, 55–56, 61, 63, 65
concept, 49
relationship between firm performance and, 52
relationship between political connections and, 50–51
Financial reporting
process, 3
quality, 29
Financial resources, 47–48
Financial statements, 29
audit reports, 258
restatements, 258
Firm audits, 301–302
Firm performance, 57, 180
relationship between financial measures and, 52
relationship between nonfinancial measures and, 51–52
Fisher r-to-z transformations, 182–183
Five Factor Model (FFM), 326
personality classifications, 327–330
Five-point Likert-type scale, 276
Flexibility/inflexibility dichotomy, 339–340
10-fold cross-validation methodology, 115
Forward-looking methodology, 115
Francophone Union of Internal Audit (UFAI), 352

Stress, 196, 202
  engineering and physiological approaches to studying, 199–200
  in public accounting profession, 202–204
Stressors, 196–197
Stressors influence accountants' performance, 196
  demographics, 221–222
  effects of stressors and mediators on performance, 222
  findings, 229
  implications for practice, 231–232
  implications for theory, 229–231
  limitations, 232–233
  metacorrelation matrix, path analysis, and moderation analyses, 222–229
  methods, 209–221
  results, 221–229
  theoretical background and hypothesis development, 199–209
Structural Equation Model (SEM), 221
Structured method, 363
Study selection process, 209–210
Subjectivity in performance measures, 50
SubNarc, 13–14, 16
Subordinate narcissism, 2, 4
  manipulation, 7–8
  research on, 4
Subsample analyses, 63–65
Superior internal process, 49
Supplemental analyses, 34–39
Support vector machines (SVMs), 115
Survey materials, 149–150
SurveyMonkey Audience panel (SMA panel), 275–276
Synthesis of behavioral accounting studies, 325–326
  authoritarianism, 335–336
  combinations of personality traits, 341

Dark Triad, 336–339
future research, 341–342
locus of control, 333–335
MBTI and FFM personality classifications, 327–330
personality traits, 339–340
tolerance for ambiguity, 331–333
type A/B personalities, 330–331

Task familiarity, 84–85
Tax, 116, 120, 140
compliance, 140
researchers, 140
Tax aggressiveness, 140–141
dependent variables, 150
Taxpayer cognition, 141
Taxpayer compliance, 141
Term frequency (tf), 113–114
Term frequency-inverse document frequency (tf-idf), 113–114
Test procedure, 220
Text mining, creating features using, 112–114
Thinking/feeling, 327–328
Threat stressor, 201
Tolerance for ambiguity, 325–326, 331, 333
Tone of communication, classification using, 125–127
Top-performing algorithms, 127–128
Transactional stress models, 201–202
Tunisia Research paper, 350
Turnover ratios, 106
Type A/B personalities, 325–326, 330–331

Unfamiliar/Negative Association (UNA), 261
Unfamiliar/Positive Association (UPA), 261
United States
economy, 27–28
firms, 80
US Generally Accepted Accounting Principles (GAAP), 89–90

Variable measurements, 178–180
Variance Inflation Factors (VIFs), 279–280
Verbosity, 116–120
Virtuous auditor, 357
Voluntary audits, 293
hypothesis development, 299–300
research design and data, 300–304
results, 304–309
theory and hypotheses development, 294–300
Voluntary external audits, 292–293
Volunteer Income Tax Assistance program (VITA), 149

WarpPLS Version 6.0, 57
Weighted least squares (WLS), 220
Whistle-blowing
legislation, 372–373
policy, 359–360
Work–family conflict, 200
Workplace
climate, 173–174
narcissism in, 4

Zero-order meta-analysis, 198
Zero-order metacorrelations, 219
