

INDEX

- Ableism, 20, 92, 127
 - femininity as response to, 95–98
- Accelerated disablement, 36
- Acquired disability, 2
- Activities of Daily Living (ADLs), 185
- Adaptation, 21
- Adolescence, 60–61
- Adulthood, 95
- Adultification, 129
- Age effects, 170
- Agency, 5, 18, 22, 36, 41–42
 - principles, 18–20
 - use of, 53–54
- Age–period–cohort effects, 15–16
- Aging, 12
 - scholars, 13
- Alzheimer’s disease, 22
- American Community Survey (ACS), 22
- American Time Use Survey (ATUS), 184, 188
- Americans with Disabilities Act (ADA), 8, 15, 39, 133
- Americans’ Changing Lives (ACL), 169
- Anthropologists, 3
- Barrier(s), 15
- Biographical disruptions, 39–40
- Biographical interviews, 110
 - French disability policy, 112–114
 - to study policy reception, 111–114
- Biography, 111–112
- Bivariate analyses, 190–195
- Black Americans, 32–33
- Care
 - adjusting to, 160
 - entering care, 154–156, 158, 161
 - exiting care, 156, 162
 - maintaining care and autonomy, 155–156, 158, 160
 - managing, 162
 - partner overload, 156
- Care work, 128–129
- Caregiving
 - career, 152
 - relationships, 146
 - roles, 4
 - types, 152
- Centers for Disease Control and Prevention (CDC), 12
- Cerebral palsy, 12
- Change, 131
- Childhood, 92
- Children and Young Adults surveys (CNLSY), 132
- Chronic health conditions, 92–93
- Chronic illness, 146
- Chronological age, 184
- Class, 59–61
- Classism, 17
- Cognitive disabilities, 22–23
- Cognitive disability, 2
- Cohort, 173
- Cohort effects, 14
- College completion, 7–8
- Congenital disability, 2
- Constrained care partners, 156–160
- Constrained caregiving, 8
- Context, 7
- Continuity, 8
- Continuous ambulatory peritoneal dialysis, 5
- Continuous-time, discrete-state event history modeling, 169, 173–174

- Convention on the Rights of Persons with Disabilities (CRPD), 15
- Couples' transitions, 8
- Cumulative dis/advantage, 16, 169
- Cumulative inequality theory, 36
- Current Population Survey (CPS), 188
- Daily living, 8–9
- Daily time, 8–9
- Deinstitutionalization movement, 15
- Demographers, 3
- Demyelination, 31–32
- Depression, 31–32
- Developmental disability, 22
- Developmental psychologists, 3
- Diagnosis, 5–6
- Diagnosis pathways, 5–6, 30
- Diagnostic delay, 34–35
- Disability gap, 184
 - analysis, 189–190
 - data and methods, 188–190
 - literature review, 184–187
 - measures, 188–189
 - results, 190–202
- Disability Rights Movement (DRM), 15
- Disability-related educational policies
 - Maryse Cloutier, 115–116
 - reception of, 114–118
 - Victor Jaucourt, 117–118
- Disability/disabilities, 2–4, 12, 51, 91, 133, 171
 - among salient identities, 52
 - identity, 6–7, 18
 - impact on siblings and challenges of disabled sibling research, 130–131
 - invoking disability, 61–62
 - policy, 108
 - scholars, 13
 - status, 12–13
 - studies scholars, 2–3
- Disabled adolescents, 16
- Disabled adults, 17
- Disabled people, 51
- Disabled sibling, 131
 - analysis, 134–135
 - data and methods, 131–134
 - research questions and hypotheses, 131
 - results, 135–139
- Disabled young adults approach
 - gender, 92
 - findings, 95–101
 - interviewee demographics, 94
 - methods, 92–95
- Discrimination, 117
- Disease modifying therapies (DMTs), 35
- Disparities, 5–6
- Doing disability, 92
- Doing gender, 91–92
- Down syndrome, 12
- Drift hypothesis, 168
- Ecological applications of resilience, 21
- Economics of disability, 129
- Economists, 3
- Education, 114–115
- Educational policy, 119–120
- Elder's model, 54
- Embodied/embodiment, 91
- Emotion work, 162
- Emotional men accommodating femininity, 100–101
- Emphasized femininity, 91
- Employer group health (EGH), 15–16
- Employment, 108
- End stage kidney disease (*see* Kidney failure)
- End stage renal disease (ESRD) (*see* Kidney failure)
- Epidemiological studies, 32
- Epstein–Barr virus (EBV), 32
- Ethnicity, 168
- Expectations, 92
- Experience, 168
- Families of disabled children, 127–129
- Femininity

- emotional men accommodating,
 - 100–101
 - as response to ableism, 95–98
 - tough women resisting, 98–100
- Feminist disability perspective, 5–6
- Feminist intersectional disability
 - framework, 34
- Feminist theorists, 91–92
- Flexibility, 21
- French disability policy, 112–114
- Functional disability, 172–173, 176

- Gender, 59, 61, 91, 129
 - and disability, 187
 - roles, 128–129
- Generation, 170
- Gerontologists, 13
- Great Recession, 8, 169, 171

- Health and Retirement Study (HRS),
 - 23
- Health disparities, 30–31
- Health outcomes, 179
- Hegemonic masculinity, 91
- Hemodialysis, 5
- Historical time and place, 36, 38–39
- History, 6
- Human agency, 18–19

- Identity/identities
 - to inequalities, 51–53
 - labels to describe inequalities,
 - 56–59
 - salience, 52
- Illness trajectory, 31–32
- Impairments, 4
- Inclusion, 114
- Income insecurity, 8
- Individualized Education Program,
 - 127
- Individuals with Disabilities
 - Education Act (IDEA), 15
- Inequalities, 51
 - identities to inequalities, 51–53
 - methods, 54–56
 - reflexivity through life course
 - perspective, 53–54
 - results, 56–64
 - studies, 55
- Inequities, 30–31
- Instrumental Activities of Daily
 - Living (IADLs), 185
- Intellectual disability, 22
- Interdependent/interdependence, 5
- International Classification of
 - Functioning Disability and
 - Health (ICF), 2–3, 14
- Intersectional approaches, 17–18, 41
- Intersectional feminism, 37–38
- Intersectional feminist disability
 - approach, 38
- Intersectional frameworks, 37–38
- Intersectionality, 37–38, 52
- Intrastate confinement, 19
- Invisible disability, 2
- Involuntary job loss, 172

- Job insecurity, 167–168
- Job precarity, 8

- Kidney failure, 4–6

- Leisure time, 185
- Life course, 109–110, 168, 184–185
 - analysis, 3
 - analytic strategy, 173–174
 - approach, 7
 - concepts and methods, 168
 - cube, 15–16
 - data, 172–173
 - disability and work precarity, 171
 - Great Recession, and precarious
 - work, 169–171
 - lens to study of impairment and
 - disability, 4
 - method, 172–174
 - paradigm, 3–4
 - results, 174–176
 - scholars, 3
 - standpoint, 108

- Life course perspective, 3–5, 36–37, 129, 147–148
 - reflexivity through, 53–54
- Life course theory, 5–6, 13–14
 - agency, linked lives, and life-span development, 18–22
 - principles, 13
 - time, place, and timing, 14–18
- Life cycle, 53
- Life stage, 2
- Life stories, 111
- Lifespan, 2
- Lifespan development, 5, 18, 22
 - principles, 20–22
- Linked lives, 5, 7–8, 18, 22, 36, 40–41, 54, 127–128, 148
- Listwise deletion, 134–135
- Lived experience, 7
- Location in time and place, 148
- Logistic regression tests, 134
- Longitudinal OLS regression models, 173
- Longitudinal regression analysis, 169

- Macro-level forces, 7
- Magnetic resonance imaging (MRI), 31–32, 39
- Marginalization, 2–3
- Masculinity, 91
- Master status, 52
- Medicaid programs, 19
- Medical sociology, 20
- Mental health disabilities, 22–23
- Micro-level effects, 7
- Mild disability, 2
- Milestone legislation, 39
- Moderate disability, 2
- Mothers with disability, 187, 201
- Multiple sclerosis (MS), 5–6, 31, 35
 - agency, 41–42
 - diagnosis, treatment, and diagnostic delay, 34–35
 - disease characteristics, prevalence, and disparities, 31–34
 - historical time and place, 38–39
 - intersectional frameworks, 37–38
 - life course perspective, 36–37
 - linked lives, 40–41
 - timing of lives, 39–40
