INDEX

Academic mathematics skills, 56–58
Activity grid display, 75
Adaptive bicycles, 167–168
Adaptive seating systems, 168
Adobe Connect, 209
Alphabet-based systems, 82
Alternative and augmentative communication (AAC), 11
Americans with Disabilities Act (ADA), 209
Answer-getting, 131–132
Apps, 99–100
ASD. *See* Autism spectrum disorder (ASD)
Assistive technologies (ATs), 133
  augmented reality (AR), 7
  biological factors, 142
  brain–computer interfaces (BCI), 7
  challenging deficit perceptions, 152–153
  continuum, 3
  critical periods, 142
  definition, 2–3
  developmental delay, 142
  device selection, 4–6
  early intervention, 142–144
  electroencephalogram (EEG), 7
  environmental factors, 142
  evaluation, 179–180
  foetal alcohol syndrome, 141–142
  high-tech assistive technology, 4
  inclusive classrooms, 178–180
  inclusive education, 8–9
  Internet of Things (IoT), 8
  Kingdom of Saudi Arabia (KSA), 218
  learning process, 149–152
  low-tech assistive technology, 3
  mid-tech assistive technology, 4
  quality of use, 148
  service and supports, 6
  Universal Design for Learning (UDL), 1–2
  virtual reality (VR), 7
  Vygotsky's cultural-historical theory, 148–149
Augmentative and alternative communication (AAC) system, 70–71, 186, 226
Augmented reality (AR), 7
Australian Early Years Learning Framework (EYLF), 144–145
Autism spectrum disorder (ASD), 52, 126, 225
  adolescents, 137
  assistive technology (AT), 133
  characteristics, 126–127
  diagnosis, 126–127
  inclusion, 128–129
  interventions, 128
  prevalence, 126–127
  robotics, 129–130
  science, technology, engineering and mathematics (STEM), 127

Battery-operated augmentative and alternative communication (AAC) system, 77
Behavioural support, 103
Belonging, inclusive education, 9–11
Brain–computer interfaces (BCI), 7
Bring Your Own Device (BYOD) format, 180

Calculators, 58
Cerebral palsy, 165–166
Children
  developmental delay, 142

early intervention, 142–143
sleep, 166
wheelchairs, 165–166
Chromebook, 180–181
Claro, 206–207
Classroom expectations, 103
Cluster grid display, 75
Coding, 132
Communication, 33
boards, 75
books, 75
Community of practice (CoP), 182
Complex communication needs (CCN)
augmentative and alternative communication (AAC) system, 70–71
communication boards, 75
communication books, 75
considerations, 83–87
definition, 70
high technology communication systems, 77–87
low technology communication systems, 71–77
symbols and symbol selection, 71
Computational thinking, 132
Computer-based graphic organiser (CBGO), 182
Concrete-representational-abstract (CRA), 57–58
Connectedness, 199–200
Content Knowledge (CK), 98
Convention on the Rights of People with Disabilities (CRPD), 144
Convention on the Rights of the Child (CRD), 144
Critical skills, 127
Critical thinking, 132

Data-driven decision-making (DDDM), 186–187
Decision-making, 33
Dedicated communication systems, 79
Designing inclusive learning, 128–130
Developmental delay, 142
Device selection, 4–6, 29–30
Digital textbooks, 60
Disabled Student Allowances (DSA), 206–207
Display arrangements, 83
Distributed grid display, 75
District Disability Rehabilitation Centres (DDRC), 40
Diverse Learners, 207
Down syndrome, 223–224
Dragon, 206–207

Early intervention, 142
assistive technology legal mandates, 144–145
conceptions, 142
evidence-based practices, 146–147
low-tech and high-tech AT devices, 149
rationale for, 143–144
service providers, 144
valuing families, 146
Economic approaches
assistive technology (AT) outcomes, 115–116
benefits, 113–114
costs, 117
economic pathway analysis, 118–121
future challenges, 121
learning environments, 116–117
mainstream technologies, 116
philosophical approaches, 112
Quality Adjusted Life Years (QALYS), 110
savings, 113–114
social return on investment, 118–121
types, 111–112

Electroencephalogram (EEG), 7
Evidence-based strategies, 53–55, 146–147

Face-to-face communication, 199–200
Foetal alcohol syndrome, 141–142
Functional mathematics skills, 59–60

Global Cooperation on Assistive Technology (GATE), 13, 39

High-tech assistive technology, 4, 41–42
High technology communication systems, 77–87
  alphabet-based systems, 82
  dedicated communication systems, 79
  display arrangements, 83
  language-based systems, 81
  nondedicated communication systems, 79–80
  selection techniques, 82
  semantic compaction, 82
  single meaning picture systems, 81
  speech output capabilities, 81

Implementation planning, 196
Inclusive classrooms, 178–180
  computer-based graphic organiser (CBGO), 182
  data-driven decision-making (DDDM), 186–187
  implementation resources, 187–189
  mobile-based graphic organiser (MBGO), 182
  overcoming barriers, 189–190
  strategy instruction and modelling, 185–186
  technology-based graphic organisers (TBGOs), 182
  training and collaboration, 180–182
  web-based graphic organiser (WBGO), 182
Inclusive education, 8–9
  belonging, 9–11
  Global Coorperation on Assistive Technology (GATE), 13
  learning, 12–13
  planning, 11–12
  teaching, 12–13
Inclusive learning, 129
Indian Standards Institution (ISI), 40
Individualized Educational Plan (IEP), 18, 21, 177–178, 217–218
Individualized Family Service Plan (IFSP), 147
Individuals with Disabilities Education Improvement Act (IDEIA), 230–231
Information and communication technology (ICT), 225
Inspiration software, 206–207
Intellectual disability, 53
Internet of Things (IoT), 8

Kingdom of Saudi Arabia (KSA), 217–218
  assistive technology (AT), 220–222
  current status, 223–224
  education system, 218–219
  individualized education plan, 230–231
  issues and challenges, 227–228
  legislation and regulations, 222
  professional development, 228–229
  special education, 219–220
  specialists in schools, 230
  teachers' attitudes, 224–225
  teachers' knowledge, 225–227

Language-based systems, 81
Learning, 12–13
  disability, 52
  environments, 31–32

Literacy skills, 102
Low-tech assistive technology, 3
  benefits, 43–44
  definition, 40–41
  District Disability Rehabilitation Centres (DDRC), 40
  Global Cooperation on Assistive Technology (GATE), 39
  high-tech assistive technology, 41–42
  Indian Standards Institution (ISI), 40
  international legislation, 39
  low-income countries, 42–46
  nongovernment organisations (NGOs), 39
  Persons with Disabilities Act, 39
  Priority Assistive Products List (PAPL), 39
  project-based learning (PBL) exercise, 46
  Rights of Persons with Disabilities Act (RPWD), 39
  UNESCO project-based learning, 46–48
  World Health Organization (WHO), 38–39
Low technology speech-generating devices (SGDs), 77

Manipulative-based instructional sequences, 57–58
Matching Person and Technology (MPT), 187–188
Mathematics
  academic mathematics skills, 56–58
  autism spectrum disorder (ASD), 52
  calculators, 58
  concrete-representational-abstract (CRA), 57–58
  definition, 55
  digital textbooks, 60
  disability students, 51–53
  effective-based strategies, 53–55
  evidence-based strategies, 53–55
  functional mathematics skills, 59–60
  intellectual disability, 53
  learning disability, 52
  manipulative-based instructional sequences, 57–58
  mild intellectual disability (MID), 53
  National Instructional Materials Accessibility Standard (NIMAS), 60
  technology-mediated mathematics (TMM), 56, 58
  virtual manipulatives, 57
Measuring participation, 170
Mid-tech assistive technology, 4
Mild intellectual disability (MID), 53
Mobile-based graphic organiser (MBGO), 182
Mobile technology, 94
Multiple message speech-generating switches, 77

National Assistive Technology Research Institute (NATRI), 188
National Centre for Educational Professional Development (NCEPD), 229
National Instructional Materials Accessibility Standard (NIMAS), 60
Neural-controlled wheelchairs, 173
Nondedicated communication systems, 79–80
Nongovernment organisations (NGOs), 39

Ozobot™, 129

Pedagogical content knowledge (PCK), 98

Persons with Disabilities Act, 39
Pertinent information, 33
Physical education, 171–172
Picture Exchange Communication System (PECS), 101
Postural management systems, 165–166
Powered wheelchairs, 167
Pragmatic organisation dynamic display (PODD), 75–76
Priority Assistive Products List (PAPL), 39
Project-based learning (PBL) exercise, 46
Project WeGotIT!, 182

Quality Adjusted Life Years (QALYS), 110
Quality Indicators of Assistive Technology (QIAT), 187

Reasoning, 130
Regional assistive technology programme, 204
Remote assistive technology services, 195–196
  accessibility, 209
  advantages, 199–201
  challenges, 202
  client's familiarity with technology, 208
  confidentiality, 209–212
  drawbacks, 203–204
  medical telepractice, 198–199
  organisation, 202
  planning, 212–213
  remote open assistive technology lab, 206–207
  remote supports, 205–206
  research, 199
  teams roles, 196–197
  University of Wyoming's ECHO AT project, 207–208
  virtual teamwork, 198
Remote monitoring, 205
Remote supports, 205–206
Remote Tutoring, 206
Rights of Persons with Disabilities Act (RPWD), 39
Robotics, 127–128
  barriers to use, 132–133
  norms, 133
  Ozobot™, 129
  unguided exploration, 134

Science, technology, engineering and mathematics (STEM), 126
  attending to thinking, 130
  learning, 130
  robotics, 127–128
  sense-making, 130
  soft skills and technical habits, 127–128
Scripting, 101
Self-propelling wheelchairs, 166
Semantic compaction, 82
Semantic-syntactic grid display, 75
Shared knowledge, 33
Single meaning picture systems, 81
Single message speech-generating switches, 77
Smart wheelchair, 164
Social skills instruction, 104
Soft skills, 127
Speech-generating devices (SGDs), 77
Speech output capabilities, 81
Standing wheelchair, 167
Student, Environment, Task, Tool (SETT) framework, 5
  assistive technology (AT) services, 30
  communication, 33
  continual process, 34
  critical elements, 32–34
  decision-making, 33
