

# INDEX

- Ability model, 4, 75
- Abstract mathematical concepts, 35
- Abstract thinking, 55
- Academic identity, 5, 22–23, 73–74
- Academic learning, 10, 16, 83
- Algebra, 33–34
- Algebra Project, 104
- American carceral system, 94–95
- American social imaginary, 75
- Andre, 66–67
- Antiintellectual, 30
- Audenried High School, 29–30
- Belief systems, 64
- Belonging, 64–68
  - as academic identity, 73–74
  - authority and membership, 74–75
  - designated identity, 74
  - falsehoods, 73–74
  - as learning, 74–75
  - misconceptions, 73–74
- Black children and mathematics, 3
- Black Lives Matter movement, 90
- Brown V. Board of Education decision, 15
- Cecil B. Moore’s college of education program, 34, 68–70, 101–102
- Classroom culture. *See also* Turner’s classroom, 32–34
- Cognitive revolution, 87
- Competence–confidence relationship, 4
- COVID-19, digital divide, 89
- Cultural racism, 21
- Culture of poverty, 5, 10, 16, 66
- Deep procedural knowledge, 32
- De facto segregation, racial separation, 20
- Developmental math courses, 104
- “Discarded” school-aged children, 20
- “Drill-and-kill” approach, 33
- Economic supremacy, 36
- Educational policies, 9
- Efficacy beliefs, 77–78
- Ethnographic study, 102
  - Oxford high school, 18
- Experiential knowledge, 35
- Exploratory learning, 32
- Factual assertions, 70
- Gender-based differences, 48
- Geniuses community, 102–103
- Global labor market, 3
- Government-funded public education, 1–2
- Government-funded residential segregation, 15
- Growth mindset concept, 4
- Institutionalized mathematical knowledge, 44
- Institutional racism, 22–23
- Kawhi, 62–63, 68–70
- Kendrick, 42–43, 51–53, 55, 59–61, 64, 68, 101–102
- K – 12 mathematics education, 5–6, 21, 33–34, 47–48

- Legitimate school, 66
- Liberalism, 91
- Master narratives, 31, 53–54, 66
- Math anxiety, 77
- Mathematics education evolution, 3
- Math person, 1, 4–6, 27, 31, 75–76
  - abstract thinking, 55
  - academic identity, 54
  - academic labels, 65
  - academic learning, 44–45
  - Americanization, 44
  - belief systems, 64
  - bunch of rules, 45, 49
  - cognitive demands, 43
  - designated identity, 55
  - economic stability, 54
  - factual assertions, 70
  - institutionalized mathematical knowledge, 44
  - ‘minority’ children, 52
  - mythical, 43
  - and nonmath people, 50
  - resilient children, 61–64
  - revisionist history, 63
  - science, technology, engineering, and mathematics (STEM), 42
  - secondary education, 42–44, 50
  - self-assuredness, 50
  - self-concept, 51
  - social inequalities, 53
  - social justice education, 44–45
  - social realities, 44
  - social types, 50
  - superpowers, 43
  - validity studies, 52
- Math wars casualties, 87, 91, 95
  - Black Lives Matter movement, 90
  - cognitive revolution, 87
  - digital divide, COVID-19, 89
  - equity, 88, 90
  - gender-based inequalities, 89
  - K-12 mathematics education, 87–88
  - mathematical illiterates, 88
  - multigenerational poverty, 89
  - National Council of Teachers of Mathematics (NCTM), 89
  - race-based “gap,”, 90–91
  - racial inequality, 89–90
  - racial injustice, 90
  - systemic injustices, 87
- Multigenerational poverty, 35
- National Council of Teachers of Mathematics (NCTM), 89
- Neoliberal and market-based campaign, 28–29
- Neuromyths, 1
- Nigel, 61–62
- Normative identity, 75–76
- Oxford High School. *See also*
  - Urban education tale, 29, 48, 83–84
  - academic learning, 10
  - culture of poverty, 10
  - de facto segregation, racial separation, 20
  - “discarded” school-aged children, 20
  - educational policies, 9
  - ethnographic study, 18
  - inflated grades, 21
  - institutional racism, 22–23
  - political and value-laden institutions, 9–10
  - race-based differences, 9
  - racial inequity, 22–23
  - regular math classes, 20
  - resilient children, 18
  - secondary education, 19
  - singular and isolated events, 19
  - social imaginary, 22
  - “the marginalized Other,”, 18
  - turnaround movement, 9
  - valedictorian, 18, 22

- Postsecondary education, 46  
 Predominantly white institutions (PWIs), 46–47  
 Process-oriented/student-centered approaches, 33  
 Profit-driven economy, 29  
 Quality education, 16  
 Race-based achievement gap, 1, 103  
 Race-based stereotypes, 68  
 Race-comparative approach, 3  
 Racial equity, 31–32  
     American carceral system, 94–95  
     Boycott Collaboration with police, 93–94  
     casualties, math wars, 87–91  
     “genius” label, 83–84  
     K-12 education, 84  
     market-based ideologies, 84  
     mathematics education, 85–86  
     mathematics education reform, neoliberal ethos, 91–93  
     social realities, 94  
     sociopolitical and cultural forces, 95  
 Racial hierarchy, mathematics ability, 1–2  
 Racial inequality, 16, 22–23, 48–49, 77, 104–105  
     mathematics education, 2–3  
     math wars, 90, 105–106  
 Rote learning, 32–33  
 Scholastic Aptitude Test (SAT) scores, 86  
 Science, technology, engineering, and mathematics (STEM), 1–2, 42  
 Self-concepts, 16–17, 27  
     designated identity, 17–18  
     math person, 51  
 Self-confidence, 78  
 Self-efficacy, 77–78  
 Shalik, 41, 49, 51, 59  
 Skills-focused mathematics education, 32–33  
 Social cognitive psychology, 77  
 Social imaginary, 105–106  
 Social inequalities, 53  
 Socialization process, 75–77  
 Social responsibility, 46–47  
 Socioeconomic oppression, 15  
 Sputnik, 86  
 Stephanie, 45, 49, 51, 63, 83–84  
 Stereotype management, 46–47  
 Students’ performance, mathematics, 2–3  
 Tamika, 45, 49, 51, 60–61, 63, 65, 68, 83–84  
 Teacher-centered education, 32–33  
 Transmission model, 37  
 Turner’s classroom. *See also* Math person, 17–18, 21, 27–28, 41, 51  
     abstract mathematical concepts, 35  
     antiintellectual, 30  
     at Audenried High School, 29–30  
     college pipeline program, 34  
     culture, 32–34  
     de-professionalization, 29  
     economic/social mobility argument, 36  
     economic supremacy, 36  
     experiences, at Oxford High School, 29  
     experiential knowledge, 35  
     low-anxiety environment, 35  
     master narrative, 31  
     multigenerational poverty, 35  
     neoliberal and market-based campaign, 28–29  
     “nonacademic” interactions, 28  
     prot-driven economy, 29  
     racial equity, 31–32

- study's participants, 28
- test scores, 28–29
- transmission model, 37
- urban education tale, 30
- Vietnamese students, 30
- Tyronne, 51, 53–55, 101–102
- Urban education tale, 5, 30, 75
  - academic demands, 13
  - Black and Latinx teenagers' experiences, 14–15
  - Black Lives Matter movement, 14
  - digital collections, 11–12
  - English and Language Arts, 13–14
  - history, 15–17
  - neoliberal and market-based initiatives, 13
  - nondescript back entrance, 10–11
  - Oxford student community, 11
  - propagation and legitimation, 12–13
  - reports, 11–12
  - white-working class families, 11
- Victor, 43, 54–55
