

INDEX

Note: Page numbers followed by “*n*” with numbers indicate notes.

- African-American parents
 - pregnancy confirmation experience, 195–198
 - and children, 192, 195
- Age, 58–59
 - age-related infertility, 5, 15
 - single and aging, 8–10
 - of women, 66
- American Society for Reproductive Medicine (ASRM), 2
- Anesthesia, 128
- ANOVA, 152–153
 - univariate, 152, 155
- Anticipated infertility, 2
- Apprehension, 37
- Assemblage
 - constructing mother as, 44–47
 - theory, 25–26, 28, 44, 46
 - thinking, 25, 27–28, 33
- Asymmetrical representations of gender, 170
- “At-risk” groups, 4
- Attitudes toward single mothers, 147–148, 158
 - quantitative results for, 152–154
- “Baby Friendly Hospitals” program, 128
- Becoming, processes of, 25
- Behavior, 90–91
- Bioecological theory, 55, 59, 62, 70
- Biographical life story interviews, 29
- Biographical Narrative Interviewing Method (BNIM), 33
- Biographical trajectories, 184
- Biological reproduction, 3, 170
 - of population, 4
- Biological risks, 5–6
- Biomedicalization processes, 4, 130
- “Birth Action Plan”, 128
- Birth pain, 87
- Birth-preparation classes, 81
 - case studies, 82
 - data and method, 81–82
 - gendered responsibilities
 - assignment in, 86–88
 - legitimation of gendered attributions in, 89–91
 - m/othering in, 84–86
 - modality of, 81
 - (re)gendering in, 83–84
- Birthing process, 83
- Bisexuality, 175–176
- Blogs, 130
- Braxton–Hicks contractions, 83
- Breastfeeding, 83
 - hormones, 91
- Bridget Jones Generation, 8
- Butler’s theory, 169
- Career men and women, 10–12
- Cerebral people, 86
- Cesarean section, 128, 130
- Child(ren), 124
 - child-rearing process, 14
 - emotional challenges of, 156
- Childbearing, 87
- Childbed, 83
- Childbirth, 81, 122, 136
 - educators, 92*n*2
 - instructors, 92*n*2
 - medicalization in Turkey, 127–131
- Chorionic villus sampling, 129
- Chronosystem, 59, 61–62
- CILIA-LG BTQI + project, 167
- Co-parenting, 144

- Communication
 - effective, 73
 - skills, 73
- Community, 59
- Conjugality, 171
- Contemporary midwifery, 103–105
- Contraception use, 54
 - confounding variables, 58–59
 - descriptive statistics of currently married women, 63–64
 - ecological contexts/systems influencing women's, 60
 - family planning worker, 56–57
 - geographical factors, 57–58
 - husband's desire for children, 55–56
 - implications, 73–74
 - limitations, 74
 - logistic regression of factors, 68
 - measures, 64–66
 - predictors, 55
 - results, 66–69
 - sample and procedure, 62–64
 - technological factors, 57
 - theoretical framework, 59–62
 - women's experiences, 62
- Contractions, 83
- Crisis, 32
 - emotional, 29, 31–32, 48
- Cryopreservation, 14

- Daddy bonus, 19n34
- Deleuzian–Guattarian term
 - assemblage, 26–27
- Demographic information, 148–149
- Divorced mothers, 160
- Dual income families, 194

- Economic ideologies, 9
- Education, 146
- Egg banking, 9
- Egg freezing, 7, 11–12
- Elective egg freezing, 2, 9, 17
- Elective gamete banking, 16
- Emotional/emotions, 29, 90–91
 - challenges of child, 156
 - crisis of motherhood, 31–32
 - turmoil, 31, 33–40
- Existential loneliness, 30
- Exosystem, 59, 61
- External Fetal Monitor (EFM), 113
- External risks, 20n46
- Extracurricular activities, 193

- Family, 59, 168
 - functioning, 180
 - life, 174
 - modernization, 171
 - sociology, 171
- Family planning, 56
 - patterns of practices, 57
 - workers, 56–57, 61, 65, 73
- Fear, 37, 39–40, 46
- Feminist/femininity, 169–170
 - scholarship, 105
 - standpoint theory, 105
- Fertility, 4, 14
 - preservation, 11
 - primary risk facing women's, 15
 - risks to, 6
- Fetal alcohol syndrome (FAS), 12
