

INDEX

- Academics, 16–17
 - tourism research on emotion, 47
- Action simulation, 67
- Active participation, 198–199
- Adoption of cognitive paradigm, 317–318
- Advertising effectiveness, 292
- Aesthetics, 186
- Affective neuroscience, toolbox of, 277–280
- Affordances, 186
 - studies, 65
 - in tourism, 71
- Agency, 91–92
- Alpha oscillations, 285–286
- Amodal information processing, 62
- Amygdala, 118
 - hijack, 118
- Anger, 165, 168–169, 171
- Antecedent-focused regulation, 167
- Appraisal(s), 40, 92
 - agency, 91–92
 - of certainty, 92
 - certainty, 92
 - definitions, 90
 - dimensions, 88–90
 - emotional intensity, 92–93
 - goal congruence, 90–91
 - novelty, 92
 - process, 53, 55, 167–168
 - satisfaction, 93–95
 - theories of emotion, 88, 92, 94–95
 - theorists, 190
 - tourism applications, 95
- Arousal, 35, 116, 293, 298–299
- Atmospherics concept, 185
- Attention, 4, 14, 26–27, 119, 187–188, 201–203, 227–229, 238, 261, 292, 300, 322
 - effect on, 120–121
 - mechanism, 262
 - stories and, 249–250
- Attentional response to novel stimuli, 119–120
- Attitudes, 110
 - schema and, 146–147
- Attribute–attribute relationship networks, 148
- Attributes, 148–149
- Augmented reality, 194–195, 205
- Authenticity, 53
- Autobiographical memory, 29, 130–131, 138–139
 - in tourism, 138–140
- Autonomic nervous system, 193, 293
- Awareness, 229
 - dimensions of, 230–231
- Awe, 214–216
 - awe-inspiring encounters, 223–224
- Behaviour, 8, 12
- Behavioural learning concepts, 99–100
- Behavioural psychologists, 24
- Behaviourism, 22
- Blood oxygenation level-dependent response (BOLD response), 279
- Bottom-up attention, 119–120
- Bottom-up attentional processing, 261
- Bottom-up processing, 62–63
- Bottom-up theory, 105–106
- Brand attribute network, 148
- Buddhism, mindfulness in, 229–230
- Buddhist meditation, 230
- Cautionary tale
 - application of cognitive psychology, 306–312
 - criticisms of particular cognitive theories, 309–311

- debates in cognitive psychology, 311–312
- Central gaze cascade effect, 203–204
- Certainty, 92
- Classification schemes, 87
- Clinical psychology, mindfulness in, 230–232
- Co-creation, 186–187, 198, 201, 203–204, 322–323
 - disambiguation of, 199–207
 - of experiences in cognitive psychology, 200–204
- Cognate phenomena, 32
- Cognition, 11, 182, 230, 311
- Cognitive appraisal process, 123, 167
- Cognitive appraisal theory (CAT), 12, 27–28, 40, 52, 79, 86, 88, 95–96, 100–101, 163–164, 171–172, 191, 213–214, 307, 310
 - of emotions, 47–48, 121–122
- Cognitive emotion elicitation process, 86
- Cognitive engagement, 254–255
- Cognitive functions, 254
- Cognitive linguistics, 145
- Cognitive load theory, 312
- Cognitive models, 12
- Cognitive narratology, 241–242
- Cognitive neuroscience, toolbox of, 277–280
- Cognitive paradigm, 20, 319
 - examples of development of, 16
- Cognitive processes, 238
- Cognitive psychological measurement techniques, 9
- Cognitive psychological models, 12, 183
- Cognitive psychological perspective, 275–276
- Cognitive psychologists, 24, 102–103
- Cognitive psychology, 5, 11, 23, 29, 80–81, 86, 101–102, 133, 144, 182–185, 194, 254, 274, 305–306, 316, 318, 321, 323
 - application of, 306–312
 - on aspects of memory in tourism, 137–141
 - attention, 187–188
 - co-creation of experiences in, 200–204
 - cognitive psychology-consistent disambiguation, 55
 - conscious episodes and tourism experiences, 80–82
 - of consciousness, 75–82
 - consciousness and tourism research, 78–80
 - current debates in, 311–312
 - eye-tracking and, 260–269
 - forgetfulness in tourism, 137–138
 - improvements using cognitive psychology theory, 39–40
 - key concepts in, 187–188
 - models of consciousness, 75–77
 - and neuroscience, 243–244
 - perspective, 51
 - prospection and retrospection, 82
 - reconstructive memory, 137
 - research, 148
 - schema and schema change, 140–141
 - semantic and autobiographical memory in tourism, 138–140
 - sensory memory in tourism, 137
 - themes in, 244–250
 - unconscious mental activity and decisionmaking, 77–78
- Cognitive reappraisal, 169
- Cognitive science, 13, 23
 - assumptions, 11–13
 - cognition, 11
 - concepts, 9–10, 14
 - folk psychology, 13
 - goals in, 101
 - interacting mental control processes, 12
 - scope, 13–14
- Cognitive technologies and experience co-creation, 204–206

- Cognitive theories, 99–100
 - criticisms, 309–311
- Cognitive wave, 4, 8, 11, 30
 - attention, 26–27
 - consciousness, 24–25
 - coping, 28
 - emotion, 27
 - emotion appraisal, 27–28
 - emotions and feelings, 28–29
 - key concepts, 24–29
 - memory, 29
 - paradigm, 5
 - perception, 26
 - sensation, 25–26
 - tourism psychological theories, 22–23
- Cognitivism, 22
- Collective memory, 128
- Commonalities, schema based
 - on, 148
- Concept map, 149
- Congruity, 146
 - theory, 61–62
- Conscious awareness, 25
- Conscious episodes, 80–82
- Consciousness, 5, 18–19, 24–25, 181–182, 184, 188
 - cognitive psychology of, 75–82
 - definitional ambiguity, 74–75
 - effect on, 120–121
 - models, 75–77
 - and tourism research, 78–80
- Construal level theory, 106
- Constructivist emotion theories, 87–88
- Constructivist theories, 87–88
- Consumer behaviour research, model
 - in, 34–35
- Consumers, 73
- Coping, 28, 167–168
 - in COVID-19 context, 174–175
 - strategies, 163–164
- Coronavirus (COVID-19), 174
 - illustration of coping in, 174–175
- Criticisms
 - and developments of original model, 37–38
 - of particular cognitive theories, 309–311
- Cue-dependent forgetting, 133
- Cultural tourism context, 288
- Cutting-edge technologies, 194–195
- Data collection techniques, 310–311
- Decision-making process, 16, 18, 77–78
- Declarative memory, 130
- Definitional ambiguity, 74–75
- Descriptive decision theories, 101
- Destination image formation, 148–149
- Digital sensory marketing, 70
- Disambiguation, 8, 17–18, 45–46, 318
 - of co-creation, 199–207
 - cognitive appraisal theory, 54
 - of emotion-related concepts, 48–49
 - examples of, 53
 - of feelings, 49–50
 - of novelty, 50–51
 - process, 199
 - surprise, 52
 - unexpectedness, 52–53
 - usage of term ‘emotion’, 47–53
- Diversity Council of Australia, The, 225
- Doctoral candidates, 4
- Dreams, 80–81
- Drive theory, 106
- Dual process framework, 173
- Dual process theory, 25, 81–82, 117–119
- Dual systems framework, 75–76
- Dualism, 24
- Eastern Buddhist meditative mindfulness practices, 230
- Eco-immersion, 213
- Ecphory, 132

- Electrodermal activity (*see* Skin conductance (SC))
- Electroencephalography (EEG), 9, 269–270, 274–275, 280–281, 286
- components, 282–283
- oscillations, 284–285
- studies in tourism, 286–288
- Embodied cognition, 238
- effects on tourist behaviour, 67–68
- Embodied perception, 26
- Embodiment, 64
- cognition theory, 64, 67
- phenomena, 83
- Emotion(al) coping
- behaviours, 28
- framework for negative emotions, 172–173
- process, 164, 174–175
- strategies, 166, 171
- in tourism, 170–172
- Emotion(al), 4–5, 12, 14, 18–19, 27–29, 47, 53, 86, 95, 160–161, 190–191, 219–220, 275, 277, 294–295, 308, 310, 320
- appraisal, 27–28
- appraisal theories of, 88–92
- classification schemes, 87
- cognitive appraisal theory of, 121–122
- disambiguation of, 48–49
- elicitation process, 49–50, 96, 123
- emotion-related ERP components, 284
- experiences, 214
- goal appraisals and, 191–192
- intelligence, 169
- labour, 170–171
- model and research on, 36–37
- processing of, 284
- psychological theories of, 86–95
- regulation, 164, 167–168
- research on emotion, 324
- stories and, 246–248
- Emotional intensity, 93
- dimensions affecting, 92–93
- Empathy, 246–247
- Encoding of memories, 131–132
- Environmental psychology, 33–34
- Episodes, 81
- Episodic events, 144–145
- Episodic memory, 29, 130–131, 155
- Episodic prospection, 157
- Errors of prospection, 158–159
- and tourist experience biases, 160–161
- Event-related potentials (ERPs), 142, 281–283, 287
- Events, 32
- stories and, 244–246
- Evidence, 317
- Evolutionary psychology, 115
- Executive functions, 25, 103
- Expectancy theory, 108
- Expectation, 108
- congruency theory, 94
- Experiences, 5, 121–123, 233
- co-creation of experiences in cognitive psychology, 200–204
- cognitive technologies and experience co-creation, 204–206
- design, 180–182, 193, 322–323
- disambiguation of co-creation, 199–207
- episode, 227–228
- experiential learning, 206–207
- Experiential approach, 123
- Experiential episodes, 276
- Experiential learning, 206–207
- Expressive suppression, 169
- External validity of eye-tracking research, 271–272
- Eye movement
- exploring psychological mechanism of, 269–270
- index, 271
- indicators, 262–263
- process, 261
- standardise research procedure of, 272

- Eye tracking, 9, 12, 310–311
 applications of eye-tracking in
 tourism, 265–269
 background to, 261–263
 bottom-up and top-down atten-
 tional processing, 261
 and cognitive psychology, 260–269
 exploring psychological mecha-
 nism of eye movement,
 269–270
 eye movement index, 271
 focusing on visual material pro-
 cessing mechanisms,
 270–271
 improve external validity of eye-
 tracking research, 271–272
 metrics and specification, 263–264
 research, 269–270
 standardise research procedure of
 eye movement, 272
 technology, 142, 266
- Facial feedback hypothesis, 49
- Feature integration theory, 311–312
- Feelings, 28–29, 192–193
 disambiguation of, 49–50
- ‘Feelings-as information theory’, 18,
 49–50, 75
- Figuration, 243–244
- Fine-grained concepts, 8
- ‘First’ generation’ cognitive science,
 242
- Flashbulb memory, 132–133
- Flow theory, 181
- Folk psychology, 13, 47, 52, 116, 124
- Food label design, 268
- Forgetfulness, 132–133
 in tourism, 137–138
- Foundation disciplines, 32
- Frontal alpha asymmetry (FAA), 286
- Functional magnetic resonance imag-
 ing (fMRI), 142, 279–281,
 310–311

- Imagination, 238
- Immersion, 212–213
- Immersive tourism experience,
212–221
awe, 214–216
case study, 217–221
cognitive appraisal theory,
213–214
recommendations, 223–226
scuba diving, 217–219
whale-related tourism, 219–221
- Implicit association test, 63, 82
- Implicit attitude test, 63
- Incentive theory, 99–100
- Information processing model, 24
- Intelligence systems, 205
- Intensive emotions, 132
- Internet of Things, The, 205
- Interpersonal strategies, 172–173
- Introspectionism, 15
- Involvement, 109, 198–199
- KLM (aviation company), 15
- Kolb's experiential learning theory,
207
- Labelling, 74–75
- Landscapes, 68
- Learning cycle, 206
- Limitations, 310–311
- Long-term memory, 29, 121, 129
structure, 130
- Measurement methods of memorable
tourism experiences,
135–137
- Mechanoreceptors, 61
- 'Meditative mindfulness' concept,
228, 233
- Memorable tourism experiences
(MTEs), 80–81, 135, 142
- Memory, 4–5, 14, 29, 89, 120–121,
127–128, 135, 189–190, 238
- cognitive psychology on aspects of
memory in tourism,
137–141
- concepts, 128–141
- encoding and retrieval of mem-
ories, 131–132
- episodic, autobiographical and
semantic memories,
130–131
- flashbulb and forgetfulness,
132–133
- measurement methods of memo-
rable tourism experiences,
135–137
- sensory and related memories,
129–130
- stories and, 248–249
