

INDEX

- Accident investigation method, 248–249
Action Plan for Beautiful and Clean Malaysia (ABC), 89
Administrative incentive (*see* Structural incentives)
Administrative incentives, 41
Affordable high-rise public housing, 181
Affordable house, 180, 181–182
Apache, 112
Aperture, 276
Approval Permit system (AP system), 221
ASEAN Agreement on Disaster Management and Emergency Response (AADMER), 18
Asian Disaster Preparedness Center (ADPC), 21
Asphyxiation, 159
Association of Consulting Engineers Malaysia (ACEM), 210
Association of Southeast Asian Nations Countries (ASEAN Countries), 17–18
 DRA in, 19–24
 DRM in, 18–19
Barlett's Test of Sphericity, 32
Bed moisture, 268
Big data, 104
Brazilian tensile strength test, 293–294
 experimental procedures for, 287–288
Brazilian test's validity, 280
Breccia (B), 287, 290
Brecciated Schist (BS), 287, 290
British Standards Institution (BSI), 8
Brownfields, 137
Business intelligence (BI), 104
Calorific value analysis, 268, 269
Canadian Centre for Occupational Health and Safety (CCOHS), 248
Carbon dioxide (CO₂), 196
Carbon emission
 carbon tax and construction industry, 7–9
 construction industry, 4–5
 impacts of carbon tax, 9–10
 reduction strategy, 7
Carbon tax, 7
 carbon emissions, 6
 carbon tax, 7–10
 carbon tax in general, 6
 and construction industry, 7–9
 construction industry carbon emission, 4–5
 impacts of, 9–10
 Malaysia initiatives, 5–6
Cascading Style Sheets (CSS), 110
Causal factors of accident, 151
 asphyxiation, 159
 being buried, 158
 being stung by hornets, 159–160
 being trapped, 159
 design safety issue, 152
 design-related causal factors in construction industry, 160–161
 drowning, 158
 electrocution, 157–158
 explosion, 158–159
 falls from height, 154–156
 fatality causal factors in construction industry, 154
 hit by object, 156–157
 hit by vehicle, 157

- non-numerical data process, 153
- OSHCIM, 151
- qualitative and quantitative methods, 152–153
- statistic of fatal accidents, 153–154
- sustainable development, 150
- Centre for Excellence in Disaster Management and Humanitarian Assistance (CEDMHA), 22
- Centroid method, 78
- Certification Service Technician Programme (CSTP), 227
- Chinese standard, 280
- Chlorofluorocarbons (CFCs), 220
- Cleat attribute, relationship between permeability and, 270–272
- Cleat distributions and orientations, 266
- Cleats orientation, 276
- ‘Climate capitalism’, 6
- Climate change, 9
- Climate Change Economics Assessment, 4
- Cluster, 8
- Coal rank, 268
- Coal sampling, 268
- Coalbed methane (CBM), 266
- Coefficient of performance (COP), 221
- Communication on construction site, 244
- Complete stress–strain curve, 289
- Compressed natural gas (CNG), 5
- Computable General Equilibrium (CGE), 9
- Computer-generated Imagery (CGI), 250–251
- Concrete, tensile strength of, 280
- Consistency ratio (CR), 140
- Construction
 - claim attributes, 48, 58–60
 - claims, 46, 47
 - critical claim attributes, 49–51
 - Cronbach’s alpha coefficient, 49
 - industries, 244
 - industry carbon emission, 4–5
 - projects, 46, 180
 - sector, 150
 - stakeholders on claim attributes, 51–53
 - validation of results, 53–54
- Construction (Design and Management) Regulations (CDM Regulations), 151
- Construction industry, 46
 - carbon emission, 4–5
 - design-related causal factors in, 160–161
 - fatality causal factors in, 154
- Construction Industry Development Board (CIDB), 187, 248
- Construction site
 - communicating with foreign workers on, 245
 - communication on, 244
- Content analysis, 8
- Coping capacity, 23
- Cost factors, 185
- Covid-19 pandemic, 166
 - demographic analysis, 170
 - gender inequality, 174, 175
 - gender perspective, 167–169
 - lockdown policy for Malaysia, 168
 - MCO, 169
 - travel analysis for work, education and groceries trip, 170–174
 - and travel behaviour, 166–167
- Critical success factors (CSFs), 181, 182–186
 - high-rise public housing in Malaysia, 189
- Cronbach’s alpha coefficient, 49
- Data
 - analysis, 32
 - collection, 31–32
 - preprocessing, 236–237
 - sorting, 267

- Data visualization
 - dynamic web system, 108–111
 - Microsoft Power BI, 108
 - process, 106
 - solutions, 106
- Database management, 114
- Decision-making process, 31, 137
- Defuzzification, 78
- Delphi technique, 47
- Density, 276
- Department of Environment (DOE), 221
- Department of Occupational Safety and Health (DOSH), 150, 248
- Department of Safety and Health (DOSH), 152
- Descriptive statistics, LSCM, 67–70
- Design for Safety (DfS), 151
- Design-related causal factors, 158–159
- Digital image, 281
- Digitised image analysis, 282
- Direct cost (*Dc*), 79
- Disaster, 16
- Disaster risk assessment (DRA), 20
 - in ASEAN countries, 19
 - global level, 22–24
 - local level, 19–21
 - regional and national levels, 21–22
- Disaster Risk Index in Brazil (DRIB), 23
- Disaster Risk Index in China (DRIC), 23
- Disaster risk management (DRM), 16
 - ASEAN Countries, 17–18
 - in ASEAN countries, 18–19
- Disaster risk reduction (DRR), 16
- Drowning, 158
- Dry ash free (*daf*), 268
- Dynamic Integrated Climate-Economy (DICE), 9
- Dynamic web system, 108–111
- Dynamic-link library (DLL), 112
- Early finish (*EF*), 79
- Early start (*ES*), 79
- Eco-industrial parks (EIP), 136
 - climate conditions, 143
 - data collection, 139
 - F-AHP, 145
 - F-AHP flow process, 141
 - F-AHP process, 140
 - F-AHP-MCDA structure, 139
 - fuzzy relative weight, 140
 - geometric mean, 142
 - mining camps, 144
 - SA, 141
 - site selection, 137
- Ecumenical Council for Corporate Responsibility, 246
- Electricity consumption, 228
- Electrocution, 157–158
- Eleventh Malaysia Plan, 90
- ‘Emission control’, 8
- Energy technology model, 9–10
- Environmental impact assessment (EIA), 137
- Environmental Protection Agency, 88, 89
- Establishment level under-reporting, 255
- European Green Deal, 4
- Extension of time (EOT), 185
- Extensometers, 280
- Factor Analysis, 32
- Factor loading (FL), 32
- Factor Score (FS), 32, 33–34
- Federal Republic of Nigeria Factories Act, 254
- Field data collection, 267
- Field survey, 267
- Financial incentives, 39, 40, 210–211
 - barriers and challenges in implementing, 214–215
- Fire
 - incidents, 122
 - safety procedures, 126
 - safety system in school, 124–127

- Fire and Rescue Department of Malaysia, 126
- Fire Prevention Action Plan, 126
- Fiscal incentive, 39, 40–41, 211–212
 - barriers and challenges in implementing, 216
- Flat loading platens, 280
- Fluorocarbon gas (FC gas), 220
 - data collection, 222
 - and effect on environment, 221–224
 - electricity consumption, 228
 - leakage and maintenance of, 226–228
 - questionnaire design, 222
 - statistical analysis, 223
- Foreign workers, 246
 - in Malaysia, 246–247
 - minimising rate of accident to, 250–251
- Four by four vehicle (4WD vehicle), 157
- Frequency analysis, 153
- 'Frequently Changing Requirements by Owner', 51
- Fundamental Research Grant Scheme (FRGS), 276
- Fuzzy logic approach, 77–79
- Fuzzy-analytical hierarchy process (F-AHP), 137
- Geology of study area, 267
- Global warming potential (GWP), 220, 223
- Gneiss (G), 287, 290
- Google Mobility Changes Report, 165
- Government of Malaysia, 38
- Green building, 7, 38–39, 210
- Green building incentives (GBIs), 38, 39, 210
 - barriers and challenges in implementing, 216–217
 - barriers and challenges in implementing financial incentives, 214–215
 - barriers and challenges in implementing fiscal incentives, 216
 - barriers and challenges in implementing structural incentives, 216
 - financial incentives, 210–211
 - financial incentives, 40
 - fiscal incentives, 211–212
 - fiscal incentives, 40–41
 - implementing in Malaysia, 39–40
 - issues, 213–214
 - parameter of, 43
 - primary and secondary data, 214
 - quantitative method, 40
 - sample size and respondent, 41–42
 - structural incentives, 212
 - structural/administrative incentives, 41
- Green incentive, 38
- Green roof, 28
 - barriers and challenge, 199–200
 - benefits of, 199
 - classification of, 198–199
 - data analysis, 32
 - data collection, 31–32
 - FS, 33–34
 - implementation of green roof, 200–204
 - KMO and Barlett's Test of Sphericity, 32
 - in Malaysia, 196–197
 - retrofitting with, 28–29
 - types of green roofs, 197
 - urbanisation, 196
- Greenhouse gas (GHG), 136
 - emissions, 4
- Griffith criterion, 280
- Gross domestic product (GDP), 4, 17
- Group 1 rocks, 292
- Group 2 rocks, 292
- Group 3 rocks, 292
- Health and safety
 - renewed focus on, 258
 - systems, 255

- High-rise buildings, 182
- Higher education institutions (HEIs), 88
- Malaysia national recycling rate, 102
 - Malaysian HEIs recycling rate, 95–97
 - recycling rate, 91–92
 - recycling rate standardization, 92–95
 - recycling rate targets in Malaysian's HEIs, 98–99
- HTML, 111
- Human hazard, 22–23
- Hydrochlorofluorocarbon (HCFC), 220, 223
- Hydrofluorocarbon (HFC), 220, 223
- Hydrofluoroolefin (HFO), 221
- Hyogo Framework, 16–17
- In situ* permeability, 274
- Inclusive Sustainable Industrial Development (ISID), 136
