SYSTEMS FOR PALLIATIVE
MEDICINE

STUDIES IN MEDIA AND COMMUNICATIONS

Series Editors: Laura Robinson, Shelia R. Cotten and
Jeremy Schulz

Volumes 8–10: Laura Robinson and Shelia R. Cotten

Volume 11 Onwards: Laura Robinson, Shelia R. Cotten and Jeremy Schulz

Recent Volumes:

- Volume 13: *Brazil: Media from the Country of the Future* – Edited by Laura Robinson, Jeremy Schulz and Apryl Williams; Guest Volume Editors: Pedro Aguiar, John Baldwin, Antonio C. La Pastina, Monica Martinez, Sonia Virginia Moreira, Heloisa Pait and Joseph D. Straubhaar; Volume Guest Associate and Assistant Editors: Sayonara Leal and Nicole Speciale
- Volume 14: *Social Movements and Media* – Edited by Jennifer Earl and Deana A. Rohlinger
- Volume 15: *e-Health: Current Evidence, Promises, Perils and Future Directions* – Edited by Timothy M. Hale, Wen-Ying Sylvia Chou and Shelia R. Cotten; Assistant Editor: Aneka Khilnani
- Volume 16: *Media and Power in International Contexts: Perspectives on Agency and Identity* – Edited by Apryl Williams & Laura Robinson; Guest Editor: Ruth Tsuria; Associate Editor: Aneka Khilnani
- Volume 17: *Networks, Hacking and Media – CITAMS@30: Now and Then and Tomorrow* – Edited by Barry Wellman, Laura Robinson, Casey Brienza, Wenhong Chen and Shelia R. Cotten; Associate Editor: Aneka Khilnani
- Volume 18: *The M in CITAMS@30: Media Sociology* – Edited by Casey Brienza, Laura Robinson, Barry Wellman, Shelia R. Cotten and Wenhong Chen
- Volume 19: *Mediated Millennials* – Edited by Jeremy Schulz, Laura Robinson, Aneka Khilnani, John Baldwin, Heloisa Pait, Apryl A. Williams, Jenny Davis, and Gabe Ignatow
- Volume 20: *Theorizing Criminality and Policing in the Digital Media Age* – Edited by Jeremy Schulz and Laura Robinson, and Julie. B Wiest
- Volume 21: *Mass Mediated Representations of Crime and Criminality* – Edited by Jeremy Schulz and Laura Robinson, and Julie. B Wiest
- Volume 22: *Media, Development and Democracy* – Edited by Heloisa Pait and Juliana Laet

ABOUT THE AUTHORS

Thomas R. Martin began his journey in healthcare working at the Cleveland Clinic Foundation. He has served as Project Lead for numerous IT implementations and mobile app developments and is a former director with Healthcare Information and Management Systems Society (HIMSS), a global, cause-based, not-for-profit organization focused on better health through information technology (IT). He has lived and worked overseas in Australia, traveling extensively in Asia Pacific for business. His research seeks to explore the intersection of health information technology and public policy with a focus on health administration using both quantitative and qualitative methods. Dr Martin is the author of articles, book chapters, and thought leadership pieces on the role of Connected Health technologies, telehealth, and health information exchange to support coordinated care.

Daniel J. Miori, MS PA-C, is a physician assistant and author. He works on the Palliative and Supportive Care team and is on the ethics committee at Erie County Medical Center in Buffalo, NY, USA. He began work in palliative medicine and bioethics in 2008 and has been active in education as well as having authored material on ethics in both scientific and popular press. He remains ever optimistic for the courage and good in all of us and for our ability to inhabit the moments of clarity and truth which define us, in whatever form those moments take.

Virginia M. Miori, Ph.D., has over 21 years of teaching experience and over 14 years of industry experience in developing and implementing statistical and operations research models in the area of supply chain/logistics. She is active in research in the areas of healthcare informatics, healthcare operations, rehab center effectiveness, scheduling, simulation, supply chain, and predictive analytics. Dr Miori has published over 38 scholarly articles, coauthored one text book and is actively engaged in interdisciplinary research, applying data science to institutional and industry problems.

Brian W. Segulin is a software developer focusing on process automation. He has over 35 years of experience designing and developing software solutions for integration, scheduling, and adaptive modeling. He has done work in the process industries including metals, glass, oil and gas, paper, and food and beverage. He specializes in integrating legacy systems with state-of-the-art control solutions, focusing on data security.

ACKNOWLEDGMENTS

We, the authors, humbly acknowledge the great time and energy our team put into creating this book. Brian W. Segulin's help in coding and data preparation was indispensable as was Thomas R. Martin's work and expertise in health information systems. We are also grateful to Kyle Chalmers, Catherine G. Cardamone, and Gabriel Gil Olavarrieta for their hard work. Most especially, however, we wish to thank Flavia Burton for her critical eye and tireless efforts. We know she will go on to do great things.

In addition to the work of those who contributed, we also wish to thank the families of all those who spent their free time bringing this volume to publishable form. You are our foundation.
