CONTENTS

List of Contributors *vii*

Series Editors' Introduction *xi*

PART I
CREATING HUMANNESS WITH TECHNOLOGY

Chapter 1 Introduction to International Perspectives on the Role of Technology in Humanizing Higher Education
Enakshi Sengupta, Patrick Blessinger and Mandla S. Makhanya *3*

Chapter 2 Socially Present? The Perception of Humanness Online through Video
Alex Rockey, Lorna Gonzalez, Megan Eberhardt-Alstot and Margaret Merrill *13*

Chapter 3 The Role of the Teacher and AI in Education
Cathrine V. Felix *33*

Chapter 4 Context-Based Projects: The Possibilty of an Optimistic Learning Approach in the Technologically Enabled University
David Edward Rose *49*

Chapter 5 The Science and Technology of Educational Interconnectedness
Jeff D. Borden *69*

PART II
EMERGING TECHNOLOGIES IN PEDAGOGY

Chapter 6 Enhancing the Role of the Hellenic Open University as a Lifelong Learning Organisation: Crossing the Rubicon into the E-Learning Era
Eugenia A. Panitsides and Afroditi Karapistola *89*

Chapter 7 Humanizing User Experience Design Strategies with New Technologies: AR, VR, MR, Zoom, Ally and AI to Support Student Engagement and Retention in Higher Education
Mercedes M. Fisher and Derek E. Baird *105*

Chapter 8 Humanization of English Language Teaching Through Computer-Assisted Language Learning in Turkish Tertiary Level English Preparatory Classes
Serpil Meri-Yilan *131*

About the Authors *149*

Name Index *153*

Subject Index *159*

SERIES EDITORS' INTRODUCTION

INNOVATIONS IN HIGHER EDUCATION TEACHING AND LEARNING

The purpose of this series is to publish current research and scholarship on innovative teaching and learning practices in higher education. The series is developed around the premise that teaching and learning are more effective when instructors and students are actively and meaningfully engaged in the teaching–learning process.

The main objectives of this series are to:

(1) present how innovative teaching and learning practices are being used in higher education institutions around the world across a wide variety of disciplines and countries;
(2) present the latest models, theories, concepts, paradigms, and frameworks that educators should consider when adopting, implementing, assessing, and evaluating innovative teaching and learning practices; and
(3) consider the implications of theory and practice on policy, strategy, and leadership.

This series will appeal to anyone in higher education who is involved in the teaching and learning process from any discipline, institutional type, or nationality. The volumes in this series will focus on a variety of authentic case studies and other empirical research that illustrates how educators from around the world are using innovative approaches to create more effective and meaningful learning environments.

Innovation teaching and learning is any approach, strategy, method, practice, or means that has been shown to improve, enhance, or transform the teaching–learning environment. Innovation involves doing things differently or in a novel way to improve outcomes. In short, innovation is positive change. With respect to teaching and learning, innovation is the implementation of new or improved educational practices that result in improved educational and learning outcomes. This innovation can be any positive change related to teaching, curriculum, assessment, technology, or other tools, programs, policies, or processes that lead to improved educational and learning outcomes. Innovation can occur in institutional development, program development, professional development, or learning development.

The volumes in this series will not only highlight the benefits and theoretical frameworks of such innovations through authentic case studies and other empirical research but also look at the challenges and contexts associated with

implementing and assessing innovative teaching and learning practices. The volumes represent all disciplines from a wide range of national, cultural, and organizational contexts. The volumes in this series will explore a wide variety of teaching and learning topics such as active learning, integrative learning, transformative learning, inquiry-based learning, problem-based learning, meaningful learning, blended learning, creative learning, experiential learning, lifelong and lifewide learning, global learning, learning assessment and analytics, student research, faculty and student learning communities, as well as other topics.

This series brings together distinguished scholars and educational practitioners from around the world to disseminate the latest knowledge on innovative teaching and learning scholarship and practices. The authors offer a range of disciplinary perspectives from different cultural contexts. This series provides a unique and valuable resource for instructors, administrators, and anyone interested in improving and transforming teaching and learning.
