

INDEX

- Academy of Social Sciences' (AcSS)
 - symposium, 108
- Academy Working Group on Research Ethics, 2
- Action research, 145
- Applied research, 145
- Aristotelian concept, 116–117
- Aspirational codes, 54–55
- Auditable risk management
 - process, 70
- Audit culture, 49

- Belmont report, 157
- Bioethics model, 66
- British Sociological Association (BSA), 1

- Canada's Tri-council policy
 - statement, 32
- Care ethics, 133–134
- Carpenter's 'virtue ethics'
 - commentary, 156–160
 - democratic rationality, 142
 - ethical codes of practice
 - classroom observation and interviews, 151
 - data release access, 152
 - participatory
 - action-research, 150
 - ethical frameworks, 146–147
 - Ford Teaching Project
 - diagnostic and
 - action-hypotheses, 150
 - formulation, 148
 - ideas and lines of inquiry
 - development, 148–149
 - independent/self-directed thinking, 147
 - negative principles, 148
 - positive principles, 148
 - problems, ideas and evidence, 149
 - limitations, 142–143
 - moral agency, deliberative inquiry
 - action research, 145
 - applied research, 145
 - features, 144
 - hypotheses source, 146
 - participatory research, 145
 - practice-based enquiry, 145
 - prescriptive rules, 143
 - procedural principles, 145
 - qualitative research
 - methodology, 145
 - rules of thumb, 144
 - principlism, 142
 - virtuous research and researcher, 142
- Carpenter's Virtuous Research Ethics Committee
 - care ethics, 133–134
 - checklists and codes, 128, 138

- cooperation, 132
- decision-making, 137
- deontic and utilitarian ethical approach, 136
- discernment, 132
- ethical assessment, 128
- intelligence, 132
- Macfarlane's virtuous researcher, 131–132
- perspicacity, 132
- pluralist approach, 136
- reasonableness, 132
- reflexive ethical engagement and teaching, 130–131
- reflexivity, 132
- research ethics tools, 132
- research relationships, 134–136
- rule-based systems, 137
- sensitivity, 132
- trouble with, 129
- Categorical imperative, 92, 114
- Character-based approaches, 23, 67
- Collaborative research, 36
- Conceptual framework, 4, 8
- Concordat to Support Research Integrity, 74
- Conduct-focussed integrity, 28
- Consequentialism, 113, 114, 181
- Contemporary philosophical work, 199
- Context-specific determinations, 158
- Contextual/situational sensitivity, 201
- Cost-benefit analyses, 113
- Democratic rationality, 142
- Deontology, 114, 181
- Duty-based theory, 92
- Economic and Social Research Council, 164
- Ethical codes, 22
- Ethical scrutiny, 68
 - formalisation, 69
- Eudaimonia/human flourishing, 6
- Evidence-based practice, 48
- Evolutionary psychology, 49
- Factional political purposes
 - aspirational codes, 54–55, 59
 - audit culture, 49
 - collective survival and reproduction, 57
 - critically virtuous, 55–56
 - disciplinary action, 52
 - ethical codes and accreditation mechanisms, 50
 - ethics committees, 58
 - 'ethnic cleansing,' 51
 - evidence-based practice, 48
 - evolutionary psychology, 49
 - fundamental attribution error, 51
 - individual virtue approach, 51
 - Institute of Business Ethics (IBE), 53
 - liberal intellectual tradition, 56
 - life-threatening consequences, 48
 - Minority Report, 57
 - morality, 60
 - motives/assign character, 58
 - organisational defensive routines, 53
 - organisational psychology, 49
 - personality characteristics, 58
 - planned actions, 58
 - replication crisis, 48
 - secondary gain, 49–50
 - 'selfish gene' hypothesis, 57
 - socialisation, 57

- societal context, 55
 - work-related behaviour, 57
- 'Focal' awareness, 185
- Ford Teaching Project
 - diagnostic and
 - action-hypotheses, 150
 - formulation, 148
 - ideas and lines of inquiry
 - development, 148–149
 - independent/self-directed
 - thinking, 147
 - negative principles, 148
 - positive principles, 148
